SOCA1200: Health Sociology 1
Semester 1, 2008
Course Outline

Co-ordinator:

Dr Alex Broom
Lecturer in Sociology
University of Newcastle
Callaghan NSW 2308
Work Phone: +61[2]49215919
Email: alexander.broom@newcastle.edu.au
Web: http://www.newcastle.edu.au/school/hss/
Room: W317 Behavioural Science Building

Consultation hours: Thursday 4-5pm

Course Outline Issued and Correct as at: Week 1, Semester 1 - 2008

CTS Download Date: 23-01-08
SOCA1200: Health Sociology 1

Brief Course Description

This course will introduce students to the sociological study and understanding of health and illness, focusing predominantly on Australian society. The course will examine the causes, nature and consequences of major health inequalities, the ways they are culturally understood, and some of the most important attempts to address them. Substantive topics may be drawn from a range of areas including the social distribution of health and illness; health promotion and illness prevention; access to health care; the state and health care system; the division of labour in the health workforce; ideologies of health, illness and inequality; and health, politics and social change.

Contact Hours

Lecture for 1 Hour per Week for the Full Term
Seminar for 2 Hours per Week for the Full Term

Learning Materials/Texts

*This book is available for purchase at the United Campus Bookshop (Callaghan Campus). Copies are also available on Short Loans (Auchmuty and Huxley Libraries). NB: This course is using the 3rd edition (2005).

Course Objectives

On successful completion of this course students will be able to demonstrate:
1. An understanding of sociological approaches to the study of health and illness.
2. An understanding of the social, economic, political and cultural factors involved in the reproduction or transformation of inequalities in health and health care in Australian society.
4. Skills in researching, constructing and presenting well-supported arguments in written and verbal form.

Course Content

1. Sociological approaches to the study and understanding of health and illness.
2. The social distribution of health and illness in Australian society.
3. Health promotion and illness prevention.
5. The Australian health care system.
6. Health, politics and social change.

Assessment Items

<table>
<thead>
<tr>
<th>Essays / Written Assignments</th>
<th>Essay 1,200 words worth due week 8 (40%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Examination: Formal</td>
<td>A two and a half hour multiple choice exam due end of semester based on lecture and tutorial readings (50%)</td>
</tr>
<tr>
<td>Tutorial</td>
<td>Tutorial participation (10%)</td>
</tr>
</tbody>
</table>

Assumed Knowledge

Not applicable.
Callaghan Campus Timetable
SOCA1200 HEALTH SOCIOLOGY I
Enquiries: School of Humanities and Social Science
Semester 1 - 2008
Lecture Thursday 10:00 - 11:00 [HB15]
and Seminar Thursday 12:00 - 14:00 [RW2-30]
or Thursday 14:00 - 16:00 [HA149]

Further details on assessment items

1. Tutorial participation:
   Weight: 10%
   Due: Throughout the Semester

2. Essay
   Words: 1200
   Weight: 40%
   Due: Week 7, Monday 31st March, 2008 (Place in Student Hub by 5.00pm)

   The essay questions will be provided early in the course.

   Criteria:
   The essay will require the student to display a sophisticated understanding of theories, concepts and data explored in the lectures and course readings.

   The essay is intended to provide an opportunity for students to critically examine and evaluate the reading material provided through this course, as well as readings students have found themselves. There are two primary aims informing this task:

   1. To ascertain whether students have a clear and sophisticated understanding of some of the key themes, concepts, theories and perspectives introduced in the readings from this course;

   2. To assess whether students can clearly and accurately express this understanding in the form of an scholarly essay.

   Students’ work will be evaluated in terms of their ability to research, analyse, evaluate and synthesize relevant knowledge. Credit will also be given to work that demonstrates imagination, style and clear and persuasive expression.

3. Formal Examination:
   Description: Two and a half hour multiple choice formal exam based on lecture and tutorial readings.

   Weight: 50%
   Due: To be held at the end of semester during the exam period.

   Students are required to submit assessment items by the due date. Late assignments will be subject to the penalties described below.
Written Assignment Presentation and Submission Details

Students are required to submit assessment items by the due date. Late assignments will be subject to the penalties described below.

Hard copy submission:

- **Type your assignments**: All work must be typewritten in 11 or 12 point black font. Leave a wide margin for marker’s comments, use 1.5 or double spacing, and include page numbers.
- **Word length**: The word limit of all assessment items should be strictly followed – 10% above or below is acceptable, otherwise penalties may apply.
- **Proof read your work** because spelling, grammatical and referencing mistakes will be penalised.
- **Staple the pages** of your assignment together (do not use pins or paper clips).
- **University Assessment Item Coversheet**: All assignments must be submitted with the University coversheet available at: [http://www.newcastle.edu.au/study/forms/](http://www.newcastle.edu.au/study/forms/)
- **By arrangement with the relevant lecturer, assignments may be submitted at any Student Hub located at**:
  - Level 3, Shortland Union, Callaghan
  - Level 2, Student Services Centre, Callaghan
  - Ground Floor, University House, City
  - Opposite Café Central, Ourimbah

- **Date-stamping assignments**: All students must date-stamp their own assignments using the machine provided at each Student Hub. If mailing an assignment, this should be address to the relevant School. Mailed assignments are accepted from the date posted, confirmed by a Post Office date-stamp; they are also date-stamped upon receipt by Schools.

  
  NB: Not all of these services may apply to the Port Macquarie Campus.

- **Do not fax or email assignments**: Only hard copies of assignments will be considered for assessment. Inability to physically submit a hard copy of an assignment by the deadline due to other commitments or distance from campus is an unacceptable excuse.
- **Keep a copy of all assignments**: It is the student’s responsibility to produce a copy of their work if the assignment goes astray after submission. Students are advised to keep updated back-ups in electronic and hard copy formats.

**Online copy submission to Turnitin**

In addition to hard copy submission, students are required to submit an electronic version of the following assignments to Turnitin via the course Blackboard website available at [www.blackboard.newcastle.edu.au/](http://www.blackboard.newcastle.edu.au/)

Prior to final submission, all students have the opportunity to submit one draft of their assignment to Turnitin to self-check their referencing. Assignments will not be marked until both hard copy and online versions have been submitted. Marks may be deducted for late submission of either version.

**Penalties for Late Assignments**

Assignments submitted after the due date, without an approved extension of time will be penalised by the **reduction of 5% of the possible maximum mark** for the assessment item for each day or part day that the item is late. Weekends count as one day in determining the penalty. Assessment items submitted **more than ten days** after the due date will be awarded zero marks.

Refer - ‘Rules Governing the Administration of Assessment Items - Rule 000113’ available @ http://www.newcastle.edu.au/policylibrary/000113.html (section 18)

Special Circumstances

Students wishing to apply for Special Circumstances or Extension of Time should apply online. Refer - ‘Special Circumstances Affecting Assessment Items - Procedure 000641’ available @ http://www.newcastle.edu.au/policylibrary/000641.html

No Assignment Re-submission

Students who have failed an assignment are not permitted to revise and resubmit it in this course. However, students are always welcome to contact their Tutor, Lecturer or Course Coordinator to make a consultation time to receive individual feedback on their assignments.

Re-marks & Moderations

A student may only request a re-mark of an assessment item before the final result - in the course to which the assessment item contributes - has been posted. If a final result in the course has been posted, the student must apply under ‘Procedures for Appeal Against a Final Result’ (Refer - http://www.newcastle.edu.au/study/forms/).

Students concerned at the mark given for an assessment item should first discuss the matter with the Course Coordinator. If subsequently requesting a re-mark, students should be aware that as a result of a re-mark the original mark may be increased or reduced. The case for a re-mark should be outlined in writing and submitted to the Course Coordinator, who determines whether a re-mark should be granted, taking into consideration all of the following:

1. whether the student had discussed the matter with the Course Coordinator
2. the case put forward by the student for a re-mark
3. the weighting of the assessment item and its potential impact on the student’s final mark or grade
4. the time required to undertake the re-mark
5. the number of original markers, that is,
   a) whether there was a single marker, or
   b) if there was more than one marker whether there was agreement or disagreement on the marks awarded.

A re-mark may also be initiated at the request of the Course Coordinator, the Head of School, the School Assessment Committee, the Faculty Progress and Appeals Committee or the Pro Vice-Chancellor. Re-marks may be undertaken by:

1. the original marker; or
2. an alternate internal marker; or
3. an alternate external marker (usually as a consequence of a grievance procedure).

Moderation may be applied when there is a major discrepancy (or perceived discrepancy) between:

1. the content of the course as against the content or nature of the assessment item(s)
2. the content or nature of the assessment item(s) as against those set out in the Course Outline
3. the marks given by a particular examiner and those given by another in the same course
4. the results in a particular course and the results in other courses undertaken by the same students.
For further detail on this University policy refer - ‘Re-marks and Moderations - Procedure 000769’ available @ http://www.newcastle.edu.au/policylibrary/000769.html

Return of Assignments

Students can collect assignments from a nominated Student Hub during office hours. Students will be informed during class which Hub to go to and the earliest date that assignments will be available for collection. Students must present their student identification card to collect their assignment.

Preferred Referencing Style

In this course, it is recommended that you use the use the Harvard in-text referencing system (similar to the APA system) for referencing sources of information used in assignments. Inadequate or incorrect reference to the work of others may be viewed as plagiarism and result in reduced marks or failure.

An in-text citation names the author of the source, gives the date of publication, and for a direct quote includes a page number, in parentheses. At the end of the paper, a list of references provides publication information about the source; the list is alphabetised by authors’ last names (or by titles for works without authors). For further information on referencing and general study skills refer - ‘Infoskills’ available @ www.newcastle.edu.au/services/library/tutorials/infoskills/index.html

Student Representatives

Student Representatives are a major channel of communication between students and the School. Contact details of Student Representatives can be found on School websites.

Refer - ‘Information for Student Representatives on Committees’ available @ http://www.newcastle.edu.au/service/committees/student_reps/index.html

Student Communication

Students should discuss any course related matters with their Tutor, Lecturer, or Course Coordinator in the first instance and then the relevant Discipline or Program Convenor. If this proves unsatisfactory, they should then contact the Head of School if required. Contact details can be found on the School website.

Essential Online Information for Students

Information on Class and Exam Timetables, Tutorial Online Registration, Learning Support, Campus Maps, Careers information, Counselling, the Health Service and a range of free Student Support Services is available @ http://www.newcastle.edu.au/currentstudents/index.html

</table>

**Plagiarism**

University policy prohibits students plagiarising any material under any circumstances. A student plagiarises if he or she presents the thoughts or works of another as one's own. Without limiting the generality of this definition, it may include:

- copying or paraphrasing material from any source without due acknowledgment;
- using another's ideas without due acknowledgment;
- working with others without permission and presenting the resulting work as though it was completed independently.

Plagiarism is not only related to written works, but also to material such as data, images, music, formulae, websites and computer programs.

Aiding another student to plagiarise is also a violation of the Plagiarism Policy and may invoke a penalty.

For further information on the University policy on plagiarism, please refer to the Policy on Student Academic Integrity at the following link -

The University has established a software plagiarism detection system called Turnitin. When you submit assessment items please be aware that for the purpose of assessing any assessment item the University may -

- Reproduce this assessment item and provide a copy to another member of the University; and/or
- Communicate a copy of this assessment item to a plagiarism checking service (which may then retain a copy of the item on its database for the purpose of future plagiarism checking).
- Submit the assessment item to other forms of plagiarism checking.
Written Assessment Items

Students may be required to provide written assessment items in electronic form as well as hard copy.

Extension of Time for Assessment Items, Deferred Assessment and Special Consideration for Assessment Items or Formal Written Examinations

Students are required to submit assessment items by the due date, as advised in the Course Outline, unless the Course Coordinator approves an extension of time for submission of the item. University policy is that an assessment item submitted after the due date, without an approved extension, will be penalised.

Any student:

1. who is applying for an extension of time for submission of an assessment item on the basis of medical, compassionate, hardship/trauma or unavoidable commitment; or

2. whose attendance at or performance in an assessment item or formal written examination has been or will be affected by medical, compassionate, hardship/trauma or unavoidable commitment;

must report the circumstances, with supporting documentation, to the appropriate officer following the instructions provided in the Special Circumstances Affecting Assessment Procedure - Policy 000641.

Note: different procedures apply for minor and major assessment tasks.

Please go to the Policy at http://www.newcastle.edu.au/policylibrary/000641.html for further information, particularly for information on the options available to you.

Students should be aware of the following important deadlines:

- **Requests for Special Consideration** must be lodged no later than 3 working days after the due date of submission or examination.

- **Requests for Extensions of Time on Assessment Items** must be lodged no later than the due date of the item.

- **Requests for Rescheduling Exams** must be received in the Student Hub no later than ten working days prior the first date of the examination period

Your application may not be accepted if it is received after the deadline. Students who are unable to meet the above deadlines due to extenuating circumstances should speak to their Program Officer in the first instance.

Changing your Enrolment

The last dates to withdraw without financial or academic penalty (called the HECS Census Dates) are:

For semester 1 courses: 31 March 2008

For semester 2 courses: 31 August 2008

For Trimester 1 courses: 18 February 2008

For Trimester 2 courses: 9 June 2008

For Trimester 3 courses: 22 September 2008

For Trimester 1 Singapore courses: 3 February 2008
For Trimester 2 Singapore courses: 25 May 2008

Students may withdraw from a course without academic penalty on or before the last day of semester. Any withdrawal from a course after the last day of semester will result in a fail grade.

Students cannot enrol in a new course after the second week of semester/trimester, except under exceptional circumstances. Any application to add a course after the second week of semester/trimester must be on the appropriate form, and should be discussed with staff in the Student Hubs.

To check or change your enrolment online, please refer to myHub - Self Service for Students

SOCA1200: Health Sociology 1 (2008)

Tutorial Program and Readings

The **required reading** for this course is:

**Week 1 (21 Feb.)**

*Course Introduction and Overview*

This week provides an overview of the course and assessment and introduces the broad area of sociology of health and illness. Drawing on the reading, we examine how sociology can help us better understand ourselves in relation to societal structures and influences, and the importance of social forces in shaping health problems.

**Required reading:**

**Further readings:**

**Week 2 (Feb. 28th)**

*Theoretical perspectives in health sociology*

This week we look at the major theoretical ideas developing in sociology as they have been applied to health and illness. We look at the ways in which sociologists have developed theories that can be applied to contemporary health issues including: suicide, mental illness, drug use, sexuality, gender and dying.

**Required reading:**

**Further readings:**

**Week 3 (March 6th)**

*Contemporary health inequalities: a focus on gender*

This week we examine the relationship between social inequalities and health outcomes. Specifically, we examine the relationships between gender and health and consider why there are differences in morbidity (rates of disease) and mortality (deaths) between males and females. We focus on the adverse effects of gender stereotypes for women and men’s health and wellbeing.

**Required reading:**

**Further readings:**

**Week 4 (March 13th)**

*The media and health*

The week we explore the role of the media in health, examining the significance of more traditional forms of media such as newspapers and television as well as the emerging role of the Internet in shaping experiences of health and illness. From eating disorders to virtual communication, this week we look at the complex intersections between mass media and new media and the health of individuals and the wider population.
Required readings:

Broom, A. (2005) Virtually He@lthy: A study into the impact of Internet use on disease experience and the doctor/patient relationship. *Qualitative Health Research* 15, 3, pp325-345.*

*This is available via blackboard under ‘course documents’

Further readings:

Week 5 (March 20th)

**Medicalisation and social control**

This week we look at the process of medicalisation and the ways in which certain types of people, personalities and behaviours have come to be viewed as ‘abnormal’, and furthermore, how they have been medicalised over time. We look at childhood behaviour (ADHD), ‘madness’, depression and suicide as key sites of medicalisation and social control.

**Required reading:**

**Further readings:**

**Week 6 (March 27th)**

**Evidence-based medicine: Politics and power in healthcare**

The evidence-based medicine (EBM) movement began to develop in the 1970s, and solidified as a key concept in health policy in the 1990s. Sociologists have regularly criticised EBM as, among other things, a threat to doctor/patient communication and the value and integrity of individual clinical judgment. Moreover, EBM has been criticised for promoting a limited view of treatment effectiveness, thus excluding health practitioners outside the ‘mainstream’. This week we examine the character and implications of EBM for different stakeholders competing to provide care to the Australian population.
Required reading:

*This is available via blackboard under ‘course documents

Further readings:

Week 7 (April 3rd)

Complementary and alternative medicine: Beyond the mainstream

This week we examine the recent rise in popularity of complementary and alternative medicines and the different ways in which sociologists have sought to explain this. A key focus is on the philosophical and ideological differences between and within CAM and biomedicine, and the models of care they espouse.

Required reading:

Further readings:

Broom, A. & Tovey, P. (2007) The dialectical tension between individuation and depersonalisation in cancer patients’ mediation of complementary, alternative and biomedical cancer treatments. Sociology 41, 6, pp1021–1039.

Week 8 (April 10th)

**Chronic illness and disability**

This week we explore chronic illness and disability from a sociological perspective. While chronic illness can be perceived by some as less important than other forms of illness (e.g. cancer), with an ageing population, chronic conditions (e.g. asthma, arthritis, back pain, coronary heart disease) are having a major impact on people’s lives and are a major cause of pain and suffering. It is argued that a sociological perspective is necessary to provide insight into the lived experiences of people with chronic conditions and disabilities.

**Required reading:**

*This is available via blackboard under ‘course documents’*

**Further reading:**

- **Mid-Semester Recess: Friday 14th April to Friday 25th April 2008** -

**Week 9 (May 1st)**

*The New Genetics: A focus on the Human Genome Project*

This week we look at the Human Genome Project (HGP) and its implications for society. The reading provides an example of how a sociological analysis can be used to broaden our understanding of the influence of emerging biotechnologies on contemporary society, as well as the influence of contemporary society on these new biotechnologies. We consider the historical, cultural, structural and critical elements associated with the HGP, and the tensions that exist between individual and collective uses of contemporary biotechnologies.

**Required reading:**

**Further readings:**

Week 10 (May 8th)

Indigenous Health: Ethnicity and multiculturalism

This week we explore indigenous health in the Australian context, examining the health differences between Indigenous and non-Indigenous Australians. We then consider some of the broader structural factors that have influenced Indigenous health and the historical factors that have produced them. We look at the social, political and cultural factors underpinning ongoing issues including to alcohol abuse, chronic illness, mental health problems, and low life expectancy amongst the Australian aboriginal community.

Required reading:

Further readings:

Week 11 (May 15th)

Ageing, dying and death

This week introduces the sociology of aging, dying and death. Of particular concern is how our understanding of aging, death and dying is socially constructed. As Strazzari (2005:245) points out in this week's reading, it wasn’t that long ago that the ‘premature’ death of an infant or child was considered ‘normal’ and unpreventable, and the achievement of old age extraordinary. These days ‘old age’ is considered somewhat commonplace and the premature death of an infant or child is seen as unacceptable and preventable. We also consider some key debates around aging, dying and death, in particular, ageism, the effects of economic rationalism, the notion that the elderly are a burden on our limited health resources, and euthanasia.

Required reading:

Further readings:

Week 12 (May 22\textsuperscript{nd})

**Health in the developing world: looking abroad**

This week we explore health issues outside Australian society, looking at key issues facing people in developing countries. Africa, India and Pakistan are used as examples to illustrate vast global inequalities in health outcomes. We also examine local beliefs about health and disease as seen in these contexts. Specifically, we look at traditional medicine and practitioners, with a focus on how indigenous healers are interacting with modern medical practitioners and institutions.

**Required reading:**

*This is available via blackboard under ‘course documents’*

**Further readings:**

Week 13 (June 5\textsuperscript{th})

**Restructuring health:**

*Competition, Rationalisation and Privatisation*

This week we examine the influence political ideologies on health policy in Australia. The ideological differences between Australian political parties and important ‘stake-holders’ (e.g. politicians, doctors, hospitals, insurance industry are delineated, and their influences on Australia’s health care system
and national health insurance arrangements are examined. Following Belcher (2005), it is argued that the current health care arrangements are not so much a rationalised response to Australia’s health needs, but more the historical product of ideological struggles and compromises, vested interests and market manoeuvrings.

**Required reading:**

**Further readings:**

**Week 14 (7/8 Jun.)**

Exam preparation time and individual consultations (if required)

[No lecture, tutorials or tutorial readings]

STUDENTS WITH A DISABILITY OR CHRONIC ILLNESS

The University is committed to providing a range of support services for students with a disability or chronic illness.

If you have a disability or chronic illness which you feel may impact on your studies, please feel free to discuss your support needs with your lecturer or course coordinator.

Disability Support may also be provided by the Student Support Service (Disability). Students must be registered to receive this type of support. To register please contact the Disability Liaison Officer on 02 4921 5766, or via email at: student-disability@newcastle.edu.au

As some forms of support can take a few weeks to implement it is extremely important that you discuss your needs with your lecturer, course coordinator or Student Support Service staff at the beginning of each semester.

For more information related to confidentiality and documentation please visit the Student Support Service (Disability) website at: www.newcastle.edu.au/services/disability
