ACADEMIC PROMOTIONS

The Vice-Chancellor announced that the Council of the University, at its meeting on 17th November, approved the promotion of the following members of the academic staff:

- Dr. A.H. Anderson, to Associate Professor in the Department of History,
- Dr. S.C. Baker, to Associate Professor in the Department of Physics,
- Dr. A.R. Barcan, to Associate Professor in the Department of Education,
- Dr. E. Betz, to Associate Professor in the Department of Mechanical Engineering,
- Dr. K.F. Collis, to Associate Professor in the Department of Education,
- Dr. G.C. Curthoys, to Associate Professor in the Department of Chemistry,
- Dr. C.F.K. Diessel, to Associate Professor in the Department of Geology,
- Dr. S.St.J. Warne, to Associate Professor in the Department of Geology.

The following Lecturers had been promoted to Senior Lecturer Grade:

- Dr. C.J. Aislabie (Department of Economics).
- Dr. K.H. Bell (Department of Chemistry).
- Dr. J.D. Browne (Department of Metallurgy).
- Mr. J.M. Heuzenroeder (Department of English).
- Dr. B.W. Lancaster (Department of Chemical Engineering).
- Dr. J.M. Lee (Department of Philosophy).
- Mrs. G.V. MacNeill (Sub Department of Linguistics).
- Dr. P.K. Smrz (Department of Mathematics).
- Dr. J.C. Turner (Department of Geography).

SENIOR ACADEMIC POSTS FILLED

Professor C.D. Ellyett, Head of the Department of Physics, was elected Deputy Chairman of Senate on 4th October to serve for two years from 1st January, 1973. He will succeed Professor L.N. Short, Head of the Department of Education.

As a result of elections held recently, the Deans of the faculties in 1973 and 1974 will be:

- Applied Science,  
  Professor E.O. Hall;
- Architecture,  
  Professor J.J. Auchmuty;
- Arts,  
  Professor K.R. Dutton;
- Economics and Commerce,  
  Professor M.O. Jager;
- Engineering,  
  Professor A.J. Carmichael;
Mathematics, Science,

Professor H.M. Lieberstein, Professor W.F.J. Pickering.

Faculty Boards elected the following representatives on Senate from 1st January, 1973:

Assoc. Professor W.A. Oates; Mr. H.G. Appleby; Assoc. Professor J.P. Bach; Mr. D.S. Karpin; Assoc. Professor A.K. Johnston; Dr. J.R. Giles; Dr. S.St.J. Warne.

**FACULTY OF LAW SUBMISSION**

Council heard Mr. W.G. Derkenne, Member elected by Convocation, elaborate upon his submission for the establishment of a Faculty of Law within the University.

Mr. Derkenne said the three university law faculties in New South Wales were located in Sydney. Decentralization of university legal education in the State was suggested to be necessary, he said, and the establishment of a Faculty of Law at the university was urged as a feasible and relatively inexpensive means to this end.

The Council sent Mr. Derkenne's nine-page submission to the Planning Committee, which will consider whether or not the proposal should be suggested as a possible new development for the 1976-78 triennium.

**E.M.U. VISITS BATHURST**

Dr. A.J. Chambers, Lecturer in Mechanical Engineering, and Mr. C. Wong, a final-year student, took the Environmental Measurement Unit to Bathurst recently at the request of The Scots School, which wanted pollution readings taken in the precincts of the school. The visit received wide publicity in provincial and Sydney newspapers.

The tests showed such little pollution that it could not be accurately measured by the unit's sophisticated equipment.

The school's headmaster (Mr. Michael Aikman) invited the environmental unit to The Scots School to rouse the interest of the students and local residents in the possibility of the district being polluted unless early steps were taken to deal with it.

The school has made history. It is the first time any organisation in Australia has ordered a pollution test before a development project has begun.

Should developers question the clean state of Bathurst's air a plaque giving the results of the test will be placed on the site.

Dr. Chambers spent the day at the school. He assured the boys that the present atmosphere was far from the point where it could injure humans. He spent the afternoon talking to the boys, explaining the equipment and the need for vigilance.

Mr. Aikman said: "There is no doubt that, with the proposed development of Bathurst and Orange as a decentralised inland city of some 200,000 people, we shall see changes in our present way of life.

"With the promised influx of commerce, industry and government administration, this is inevitable. No doubt some changes will be welcomed as a forward step for Bathurst and Orange."
The Vice-Chancellor announced that the Council of the University had appointed Dr. K.E. Lindgren, B.A.(N.S.W.), LL.B.(London), M.A., Ph.D. to the newly created Chair of Legal Studies.

Dr. Lindgren became an articled clerk on leaving school in 1957 and obtained first place in New South Wales at the examinations of the Solicitors' Admission Board whilst concurrently proceeding to a Bachelor of Arts degree at the University of New South Wales through the Newcastle University College. He was admitted a Solicitor of the Supreme Court of New South Wales in 1962 and in the same year became a partner in the law firm of Harris, Wheeler, Williams and McKenzie. In 1965 he was awarded the degree of LL.B. by the University of London and in 1967 an M.A. degree from the University of Newcastle where he was recently awarded his doctorate. In 1969 Mr. Lindgren joined the staff of the University of Newcastle as Lecturer in Legal Subjects and was promoted Senior Lecturer in 1971.

The Vice-Chancellor said Dr. Lindgren had a remarkable publication record which included four monographs written in collaboration with other distinguished legal scholars and a dozen or so articles in learned journals. He was also joint editor of a collection of legal essays to appear next year.

Dr. Lindgren had also taken an active part in community affairs and had been in demand for advice in many University Departments and other organizations.

Professor Auchmuty said that although Legal Subjects have long been taught within Faculties of Economics and Commerce in Australia, this was the first appointment to a full professorship in any such Faculty and gave a great opportunity to Professor Lindgren to give scholarly leadership to legal disciplines in the preparation of graduates in Commerce and Economics.

STUDENTS, DEMONSTRATORS, TUTORS TO PARTICIPATE

Council has made regulations extending membership of the Senate and Faculty Boards.

In the case of the Senate, membership has been expanded to include four student members, the Warden of Edwards Hall, the Director of the Computer Centre, the Senior Student Counsellor and the Director of Community Programmes.

The Faculty Boards have been enlarged to admit to membership full-time Senior Demonstrators, Demonstrators, Senior Tutors, and Tutors of the departments composing the Faculty and the following numbers of students: Applied Science 2, Architecture 2, Arts 6, Economics and Commerce 4, Engineering 4, Mathematics 2 and Science 4.

In accordance with the regulations the first election of student members of the Senate and the Faculty Boards will be held at the start of First Term next year.

The Council made the regulations on 17th November after being informed that the appropriate amendments to the By-Laws of the university had been approved by the Governor and the Executive Council and action had been taken for the amendments to be published in the Government Gazette.

The Council had adopted last July a number of proposals for greater participation by students in university affairs, including student representation on Senate and Faculty Boards.

START ON BIOLOGICAL SCIENCES

Council was told that a contract valued at approximately $633,000 had been signed with Jace Developments Pty. Limited, of Warners Bay, for the construction of the Biological Sciences building and that work had begun. The project is expected to be completed by the end of 1973.
NEW UNDERGRADUATE TARGET

The Deputy Chairman of Senate (Professor L. Short) told the Council that the target figure for new first year undergraduate students for 1973 was 150 more than for this year.

The Council fixed the intake of new first year students at 1,150. Places will be reserved for mature age students, sponsored overseas students and other non-standard matriculants who satisfy the Admissions Committee that they are of sufficient merit.

The Council approved the following apportionment of new first year places:
- Mature age students, maximum 30 places;
- Sponsored overseas students, maximum 25 places;
- Other non-standard matriculants, maximum 145 places and standard matriculants, minimum 950 places.

Unfilled places will be reallocated at the discretion of the Admissions Committee.

ACTING HEADS APPOINTED

Council appointed the following members of staff as Acting Heads of their respective departments and members of Senate during the absences of the Heads on study leave:

Assoc. Professor W.R. Walker (Department of Chemistry), for eight months from January, 1973.

Assoc. Professor A. Herzog (Department of Civil Engineering), six months from January, 1973.

Miss M.E. Guilford (University Library), for six months from January, 1973.

Professor M.G. King, who has been chosen to fill the second chair in Psychology, was appointed Head of the Department of Psychology for a period of two years from 1st January, 1973. Professor J.A. Keats, presently Head of the Department, will relinquish office at the end of this year. He leaves soon afterwards on study leave.

BOARD MEMBERSHIP

A meeting of the Board of Community Programmes will be convened to nominate three people as representatives of the community on the Board. The University Council will appoint the community representatives.

At the Council meeting on 17th November a report was submitted indicating that Senate had elected the following as its representatives on the Board:

Professor C.D. Ellyett (Chairman), Professors M.O. Jager, M.L. King, D.G. Mowatt and L.N. Short and Assoc. Professor A.S. Ritchie.

Council was also informed that elections for representatives of Faculty Boards had resulted:

Assoc. Professor W.A. Oates (Applied Science)
Dr. N.H. Clouten (Architecture)
Mr. R.McL. Robinson (Arts)
Mr. V.G. Taylor (Economics and Commerce)
Assoc. Professor A. Herzog (Engineering)
Professor H.M. Lieberstein (Mathematics)
Assoc. Professor A.S. Ritchie (Science)

Mrs. B. Lord and Mr. J. Cornelius were appointed by the Council as its representatives.
It is hoped that the transfer of the staff and the work of the Department of Adult Education of the University of Sydney to this university and the establishment of the proposed Department of Community Programmes will become effective on 1st January, 1973. The Board of Community Programmes will be responsible to Council through the Senate for the operation of the proposed department.

ACADEMIC APPOINTMENT

Dr. K.L. Murty has taken up duties in the Department of Metallurgy as a Post-doctoral Research Fellow. He holds the degrees of B.Sc. with honours and M.Sc. in Andhaka University (India) and M.S. and Ph.D. in Cornell University (U.S.A.). Before joining this university Dr. Murty was a Research Assistant with the University of Berkeley.

DEGREE APPROVED

Council decided that a Master of Science degree would be awarded to Ronald Henry Roberts (Department of Physics) whose thesis was Mid-Latitude Observations of Cosmic Noise Absorption.

EDUCATION RESEARCH PRIZE

The N.S.W. Institute for Educational Research will, in future, sponsor prizes to be won annually by students who submit the best theses for degrees in Education.

The prize will be known as the Institute for Educational Research Prize. Provided there are candidates of sufficient merit the prizes will be awarded annually. The winners will be proposed by the Head of the Department of Education.

CHRISTMAS CARDS ON SALE

Christmas cards are available for purchase by students and members of staff.

The cards depict trees in grounds of the University. The sketch was executed by Mr. Ian Henderson, Senior Instructor in Architecture. The cards can be purchased from the Cashier for 10 cents each.

ANNIVERSARY DINNER

Three hundred and fifteen people (members of the academic and graduate staffs with their wives) attended the university's anniversary dinner in Edwards Hall on the night of 17th November.

It was the first anniversary dinner to be conducted in the hall and the biggest dinner for which the hall has catered. The special menu included cold Vichyssoise soup, fresh grapefruit stuffed with king prawns and roast goose with wild plum and claret sauce.

To serve the needs of such a large group of diners the Warden of Edwards Hall increased the normal number of chefs, cooks, kitchen staff and waitresses by 600 per cent. The wine caterer employed 10 waiters.

Dr. Blackmore said some members of the university's staff still did not know that they were welcome to have dinner at Edwards Hall on any day of the week. Dinner, consisting of three courses, plus coffee, cost $1 per person. Alcohol was permitted in the dining room. The Hall office (67 2615) should be informed of visitors for dinner no later than 3 p.m.
A postgraduate student attached to the Department of Mechanical Engineering has just completed a commentary on both the problems facing the Port of Newcastle as regards bulk cargo handling and developments suggested to solve the problems.

The student, Mr. B.J. Couper, contends that a site for the carving of a deep water harbour out of the foreshore of Stockton Bight should be fixed closer to Newcastle than the site proposed by the State Government.

The Minister for Public Works (Mr. Hughes) has asked the Head of the Department of Mechanical Engineering (Professor A.J. Carmichael) for a copy of Mr. Couper's report so he can consider it.

Mr. Couper, who is working on a Ph.D. thesis dealing with bulk cargo transportation systems for Newcastle, said that basically the main approaches to solving Newcastle's port problem were to develop: The existing Port of Newcastle, a deep water harbour and associated industries at Port Stephens or the Stockton Bight region.

"Newcastle - An Economic Proposition? It would cost approximately $20 million to deepen Newcastle Harbour to 40 ft, which means approximately 70,000 DWT ships could enter. However, today the requirement is for much larger ships. Ships of up to 150,000 tons capacity would be needed to service major Australian steel plants in the future, if the steel industry were to compete on world markets.

"Port Stephens - A Story of public pressure. Port Stephens has long been considered as perhaps the obvious area for a deep water harbour and industrial development. It is the largest natural harbour in N.S.W. with over 50 miles of protected water. Although more than half of the harbour is shallow with depths less than 15 ft, deep water channels and anchorages exist, particularly in the vicinity of Soldier's Point and Salamander Bay.

"Numerous methods of moving cargoes between Port Stephens and Newcastle have been considered, including a canal from Port Stephens to Newcastle via Tilligerry Creek to accommodate LASH lighters or barges, rail systems, truck-tractors on private roads, semi-trailers on public roads, belt conveyors and slurry pipelines.

"However, public opinion on industry and its necessary evils, has changed substantially in the last few years to the point where it can exert considerable pressure in favour of the preservation of man's environment. A couple of examples will perhaps emphasise this point.

"Investigations were carried out by Clutha Developments Limited into the construction of an offshore loader at Fly Roads, near the entrance to Port Stephens. Public opposition to the use of this site was severe and a recent statement by the Minister for Mines gives an indication that other sites are more probable. Western Sea Services Pty. Limited initiated enquiries regarding the installation of a loader either south of Newcastle near Redhead or north of Stockton. Public objection developed in both regions because of the fear of pollution, despite assurances that every care would be exercised to operate a protected industry.

"The ultimate example is in the Premier's recent statement on the Port Stephens choice, when he said: 'The Government had set aside plans to establish a deep sea port at Port Stephens for environmental reasons'.

"Stockton Bight and Newcastle. Three main ideas have appeared recently on this location. Estimates to construct an offshore loader 3 miles north-east of Newcastle are approximately $27.8 million. It would feed by rail from the main line at Tarro to Fullerton Cove, thence by conveyor to the sea-front and outside the wave movement to up-to-160,000-ton vessels. Alternatively, to transfer coal from the rail point on Kooragang to Fullerton Cove on a similar scheme would approximate an expenditure of $27.2 million. The third idea is to carve a deep water harbour out of the coastal strip along Newcastle Bight to form the nucleus of an 'industrial estate' for heavy industry. This harbour would have the approximate dimensions of three and a half miles long, half a mile wide and 60 ft deep, allowing tankers of approximately 180,000 DWT to enter fully laden.
Estimated to cost up to $250 million, this is basically the idea recently announced by the Premier.

"The new port, while providing for large ships, industrial growth, decentralisation and environmental protection, must also allow one of the world's largest industries (B.H.P.) to benefit from its services. The Hunter, with its two arms and Fullerton Cove, will pose problems and increase costs for the provision of rail, road, electricity, pipeline and associated services.

"Unfortunately, the location of any harbour and industrial complex north of Newcastle imposes further burdens on the already threatened suburb of Stockton. The recent pollution and contamination inquiries suggest that, perhaps, 'the writing is on the wall' for Stockton.

CHOICE OF HARBOUR SITE. Where then, should an artificial harbour/off-shore loader be situated for the Newcastle Region? A new deep water harbour would be extensively used by existing industries and must be as accessible to these existing industries as is feasible. A site in Stockton Bight some three to four miles below the site proposed by the Government would seem to offer the best compromise. The advantages include easier provision of services to the harbour. If Stockton does become predominantly industrial, the carving of a canal through the peninsula to the existing harbour for barges and lighters becomes a very real possibility. In addition, Kooragang would be sited almost adjacent to a world standard harbour, a fact which should encourage industries to use Kooragang.

"Heavy industry, such as that already at Newcastle, produces substantial air pollution, both gaseous and dust. With suitable planning, even with a substantial increase in Newcastle's industry, the problem can be reasonably contained. The building of an on-shore harbour such as that indicated by the Premier will increase coastal pollution in a critical area where there are Water Board catchments and rich dairy farming areas.

"It is believed that the R.A.A.F. base at Williamtown should be phased out over a period of time. This would leave Williamtown as an almost ideal site for a major airport to service Newcastle, Port Stephens and surrounding areas. Obviously, extensive port and industrial development in the area suggested by the Premier adjacent to Williamtown could lessen its value as a major or international airport.

"Finally, it would seem that the siting of the proposed new deep water port or anchorage close to Kooragang Island and the Port of Newcastle would represent a well integrated and viable shipping and industrial complex," Mr. Couper added.

The Council on 17th November discontinued the system whereby students who fail to pay fines imposed for the late return of books to the Library are charged a further $1 a week.

Instead, the Council withdrew borrowing privileges from readers who fail to pay fines for late return books.

The names of students who have failed to pay fines for late return of books within four weeks of the fine being levied will, from First Term 1973, be sent by the Cashier to the Assistant University Librarian (Readers' Services), who will withdraw borrowing privileges until the outstanding fines are paid.

At the Council's previous meeting Miss B. Callcott, Member elected by students, requested that interest on unpaid library fines be made less severe. Her case was subsequently considered by the Library Services committee.

R E P O R T S O N S T U D Y L E A V E

Dr. A.G. Dooey, Senior Lecturer in Education, reported to Council on his 12 months' study leave which ended in September. He was a Sessional Lecturer at
the University of Alberta, Edmonton, Canada, and a Visiting Professor at the Sir George Williams University, Montreal. He addressed seminars, gave a public lecture, attended conferences and visited Universities in Canada, the U.K., Austria and Hungary.

Assoc. Professor C.S.L. Keay, of the Department of Physics, spent his study leave (August, 1971 to August, 1972) at the University of Arizona, U.S.A., where he was a Research Associate of the Lunar and Planetary Laboratory and a staff member of the Steward Observatory. He was given the task of developing a scanning device which would obtain infra-red maps of astronomical objects. The work was a success (maps were obtained of regions of Jupiter) and it is likely Professor Keay will go back briefly to Arizona soon. He also visited the University of California, Florida Atlantic University and N.A.S.A. Spaceflight Centre, Houston.

Miss J.E. Murray, Assistant University Librarian (Readers' Services) visited libraries in the U.K. and attended the International Federation of Library Associations Conference in Budapest. Leaving Australia in April, she visited 24 university libraries, various National libraries, the British Museum, the Shakespeare Memorial Library, the British National Bibliography and the Public Records office. Miss Murray returned to Australia in September.

SUB-DIVISION CALLS FOR OFFICERS

The University of Newcastle Sub-Division of the Public Service Association of New South Wales is calling for nominations for the following positions for 1973: Chairman, Secretary, eight Committee members, one delegate to Central Council, two delegates to the Government Agencies Division Council and two delegates to the annual conference.

Nominations will close with the Returning Officer (Mr. F. Boden) on 24th November at 5 p.m.

ADVERTISEMENTS

TO LET: Fully furnished house at Charlestown, available for twelve months lease from late December, 1972; 2 bedrooms, large lounge-dining room, etc., automatic washing machine, clothes dryer, 'phone, garage; 'phone 43 5942.

FOR RENT: Home unit, near City (Lemnos Parade), compact but very comfortable, fully furnished; suits a single member of staff, or a young couple; available for approximately twelve months from mid-January, 1973; contact Bill Doniela (Philosophy Department, Ext. 326), or 'phone 2 3611.

FOR SALE: New (unused) set finely moulded chess pieces, $70 or near offer, Ext. 208.

COMING EVENTS

Conference at University

The Australian Institute of Steel Construction is expected to be the first professional body to use the Great Hall of the University for a major conference.

The Institute will conduct its National Conference at the University in the May vacation next year. Eminent engineers will travel from the U.K., Japan and the U.S.A. to deliver papers at the conference, which will be attended by more than 200 delegates.

The Great Hall will be used for addresses and meetings, while many visitors will be accommodated in Edwards Hall.
Dinner

Tickets are available from the Department of English office for the Annual Dinner of the English Society to be held in the Union on Monday night, 27th November, beginning at 7.30 p.m. Tickets cost members of the society $3.40 and non-members $3.80. Mr. B. Hazell, Student Counsellor, will be guest speaker and the Talbot Prize will be awarded to the author of the best parody of a lyric.

Inspection

In appreciation of the service rendered to the University and its students, citizens who make accommodation available in their homes to students have been invited to an inspection of the University on Friday afternoon, 1st December.

In addition, the University is anxious that those people who made accommodation available by private arrangements with students should also receive an invitation. Students who have been provided with accommodation in this way are asked to give the name and address of the person concerned to Mr. J.W. Armstrong, Secretary's Division (Room G 68, Ext. 341) so that an invitation can be sent.

George 3

A general meeting of users of the University's Computer will be held in Lecture Theatre B01 at 1400 hours on Wednesday, 29th November, to introduce users to George 3. Following this meeting, regular George 3 test sessions will be provided to enable users to familiarize themselves with the system.

Hostel Group's Meeting

The next general meeting of Newcastle International Student Hostel Steering Organisation will be held in the Staff House on Wednesday, 29th November, at 7 o'clock. General business will include discussion on the articles of association for a company limited by guarantee and on the acquisition of an area of Crown Land.

Overseas Students Talk

Mr. S. Ngau, Overseas Students' Service Director, has been informed by the Department of Immigration that a special talk will be given for overseas students in the Central Lecture Theatre, University of New South Wales, Sydney, on 5th December at 1 p.m. The talk has been arranged by the Department of Labour and National Service and will be concerned with the question of overseas students remaining in Australia after being awarded degrees so that they can obtain practical experience.

Final Meeting of 1972

Newcastle Area Committee of The Economic Society of Australia and New Zealand will hold its final meeting of 1972 in the Union Lounge on 5th December at 6.30 p.m.

The meeting, which will be an informal one, consisting of a buffet dinner and symposium, is open to members and friends of the society and their wives. The subject of the symposium will be "Water Rating in the Newcastle Area". Speakers presenting papers will be: Mr. G. Watters (B.H.P. Co. Limited), Mr. J. Pullen (Department of Adult Education, University of Sydney), Dr. C. Aislabie (Department of Economics, University of Newcastle), Mr. R. Gibbins (Department of Commerce, University of Newcastle) and Mr. W. Sheehan (Department of Economics, University of Newcastle).

Social Club's Cabaret

The University Staff Social Club will hold its annual Christmas Cabaret in the Union on Saturday, 9th December, from 8 p.m. to 2 a.m. The cost for social club members is $3 a double and for non-members $10 a double. The band of Ray Penman will entertain and bookings can be made through Mrs. S. Gibson (Ext. 250).
Booze Cruise

The Shortland Alpine Club, whose membership includes some university staff, will hold a Booze Cruise up the Hunter River on Sunday, 10th December. Entertainment will be provided by the Original Maryville New Orleans Jazz Band. The ferry will leave Stockton passenger ferry wharf at 2 p.m., returning at 5 p.m. for a barbeque at Merewether Beach. The cost is $1.50 for an adult and 50¢ for a child.

Philosophy Club

On the night of the Arts Examiners' Meeting (and unofficial release of Arts results) the Philosophy Club will hold its traditional informal party: 7 to 11 p.m., Wednesday, 13th December, Union Lounge. Some liquid refreshments will be provided free. All club members, Philosophy students, friends and staff are cordially invited to drop in. Admission: members free, 50 cents per others.

Scottish Country Dancing

If you have joined this University during the year, then you may not realise that the above activity has some devotees on the campus. We are part of the Newcastle Colleges Scottish Country Dance Club, which meets every Friday night at 8 o'clock in the Technical College Union Hall, Tighes Hill. Our final night Social and Christmas Party, which you are welcome to attend, is on 15th December. Please get in touch with either of the following for further information: Mrs. Jean Conway (Library), Ext. 393; Dr. Heinz Duewell (Chemistry), Ext. 437.

Annual Meeting

The annual general meeting of Members of TUNRA will be held in the Council Room at the university at 12 noon on Friday, 15th December.

Bar-B-Q

The Council for Civil Liberties, Newcastle Branch, will hold a Bar-B-Q at the home of Professor G. Tanner, 19 Wolfe Street, Newcastle, on Sunday, 17th December, beginning at 5 o'clock. Bring yourselves, friends, meat, drink and utensils. The fire and garnishings will be provided. A donation of $1 a head will help the Branch's finances. R.S.V.P. to Mr. Chris Enright, (Department of Commerce) who said all freedom-loving people are welcome.

S P O R T I N G  N E W S

Double Achievement

Dr. Kevin Lindgren became a full professor on the afternoon of 17th November. The very next day his high feelings were repeated when University won a district tennis competition. Professor Lindgren, A. Richardson, T. Cranfield and D. Broad took out the grand final of the A Reserve Grade Winter Teams' Competition by defeating West Wallsend.

Inter-Faculty Cricket

With four matches concluded in the Inter-Faculty Staff Competition, Arts, Accapad and Engineering have each won one game and Science and Commerce have played a tie. Arts (G. McMinn 37 ret., C. Whitehead 27, R. Loughran 26) scored 5 for 175 against Engineering, which had an aggregate of 91 (G. Hanson 18). C. Whitehead took two wickets for 7, B. Murphy 2-13 and D. Karamachetty 2-28. Accapad's (Accounts/Personnel/Planners) total was 145 (N. Porter 33, J. Couper 26) in the match against Science. The opposition scored 98 (I. Eckhard 26, K. Schmalzl 22). B. Boettcher took 4-16 and M. Edmunds 4-5. Engineering scored 208 (G. Preston 51, O. Scott 50) when it played Student Administration which accumulated 174 (H. Presker 36 ret., V. Bridgewater 34). P. Kleeman took two wickets for 25. Science and Commerce each scored 128 in their match. I. Eckhard made 25 runs, K. Schmalzl 18, D. Karpin 29 and B. O'Shea 25).
