Proposal for Amalgamation
Departing Professor

The University's departing Professor of Drama, Rob Jordan, is thankful to Newcastle for seven exhausting and exhilarating years.

Professor Jordan came to Newcastle from the University of Queensland in 1976 when Drama was the basic section of a potential Department of Creative Arts. Music, Fine Arts and Cinema were accepted as desirable future adjuncts to Drama within the Department. However, these developments became quite impracticable with the effluxion of time and the increased squeeze on University funding. Now, somewhat ironically, the idea of a Creative Arts section is being revived, as one possible outcome of the proposed merger of the University with the Newcastle College of Advanced Education.

When the Department of Creative Arts was launched in 1975, 150 students enrolled, twice the expected number. By 1977 student numbers had dropped away significantly but since then there has been a marked revival and this year the Department received 105 first year students, one of the best enrolments for the Faculty. While staff numbers are still small, the Department now teaches five subjects, including honours, and, through its control of the Drama Theatre and the Drama Studio, has some of the best teaching facilities in the country.

Biology on the move

The second August Discussion was being held in the Department of Biological Sciences as this issue of the News went to press.

The title of the meeting, Biology on the Move, was chosen to highlight the aim that the participants should discuss those areas of Biology which are least amenable to explanation using current concepts.

A year ago, the first August Discussion was organised in the same venue by Dr. Tim Roberts (the University of Newcastle), Dr. Brian Daunter (the University of Queensland) and Dr. Bevan Reid (the University of Sydney). At that time it was intended that three research groups should meet for informal discussions. The result was a very successful and stimulating exchange of ideas, involving 23 participants. Such was the enthusiasm generated that a second August Discussion was scheduled for 1981.

While the main thrust of the teaching is academic, it is inevitably the Department's production activities that have attracted most attention. Professor Jordan says that these have involved tension between the need to provide practical theatre work for as many students as possible and the desire to put on stage productions which would be of a high standard. "Essentially we put on shows to give the students a direct experience of the theatrical process. If we were chiefly considering the public we would concentrate on small cast shows, using only the experienced and really talented students. Instead, we have gone for large cast shows, to include as many students as possible, and this has meant taking risks artistically, as well as putting a considerable strain on the Department, since large-cast shows tend to be logistically very complicated. The gamble has often paid off, with a mass of students learning a great deal about theatre and the audience having a good time. Our production of The Cradle would be a case in point."

He admitted to being excited by the thought of working as the University of New South Wales' new Professor of Drama. Because of its size and position in Sydney, the University of New South Wales' Drama School was the major academic drama school in the country. He thought there would be an opportunity for fruitful collaboration between his new department and the one which he is vacating.

STAFF - appointment

Mrs. J.M. La'Brooy, Administrative Assistant, Secretary's Division.

resignations

Mrs. K.A. Magill, Stenographer, Faculty of Medicine.

Miss S. Murphy, Stenographer, Secretary's Division.

Retirement

Mr. T.F. Boden, Technical Officer, Department of Metallurgy.

The topics under discussion range from basic immunology and reproduction to the more esoteric areas of crystal structure, the role of molecular vibrations in living systems, prebiosis and the uterus as a resonance chamber. It is hoped that a synthesis of the mathematical physical and psychical influences on life itself will be attempted. In short, the meeting is a forum for open discussion.

Dr. Evans

Dr. Michael Evans has been appointed Acting Head of the Department of Drama while the Council deliberates on what action it will take concerning the Headship and the Chair of Drama. Dr. Evans is on secondment from the Department of Classics.

The University's departing Professor of Drama, Rob Jordan, is thankful to Newcastle for seven exhausting and exhilarating years.

Professor Jordan came to Newcastle from the University of Queensland in 1976 when Drama was the basic section of a potential Department of Creative Arts. Music, Fine Arts and Cinema were accepted as desirable future adjuncts to Drama within the Department. However, these developments became quite impracticable with the effluxion of time and the increased squeeze on University funding. Now, somewhat ironically, the idea of a Creative Arts section is being revived, as one possible outcome of the proposed merger of the University with the Newcastle College of Advanced Education.

When the Department of Creative Arts was launched in 1975, 150 students enrolled, twice the expected number. By 1977 student numbers had dropped away significantly but since then there has been a marked revival and this year the Department received 105 first year students, one of the best enrolments for the Faculty. While staff numbers are still small, the Department now teaches five subjects, including honours, and, through its control of the Drama Theatre and the Drama Studio, has some of the best teaching facilities in the country.

While the main thrust of the teaching is academic, it is inevitably the Department's production activities that have attracted most attention. Professor Jordan says that these have involved tension between the need to provide practical theatre work for as many students as possible and the desire to put on stage productions which would be of a high standard. "Essentially we put on shows to give the students a direct experience of the theatrical process. If we were chiefly considering the public we would concentrate on small cast shows, using only the experienced and really talented students. Instead, we have gone for large cast shows, to include as many students as possible, and this has meant taking risks artistically, as well as putting a considerable strain on the Department, since large-cast shows tend to be logistically very complicated. The gamble has often paid off, with a mass of students learning a great deal about theatre and the audience having a good time. Our production of The Cradle would be a case in point."

He admitted to being excited by the thought of working as the University of New South Wales' new Professor of Drama. Because of its size and position in Sydney, the University of New South Wales' Drama School was the major academic drama school in the country. He thought there would be an opportunity for fruitful collaboration between his new department and the one which he is vacating.

Congress participants

A contingent of plant scientists from the Departments of Biological Sciences and Geography will be actively participating in the XIII International Botanical Congress in Sydney from August 21 to 28. The University of Sydney will host the major congress, which will be the first IBC to be held in the Southern Hemisphere. It is estimated that more than 3,000 plant scientists from around Australia will participate in the congress.

Following an opening ceremony in the Concert Hall of the Sydney Opera House on August 21, delegates will have the opportunity to engage in the Scientific Programme, to be composed of 12 concurrent sessions.

Many overseas guests will learn more about the unique Australian flora by viewing a film prepared specially by the CSIRO, and Australian botanists and field trips.

There will also be general and youth programmes, the former of which are intended for those interested in plants but not engaged in research or teaching at a tertiary level. A special feature will be a series of public lectures given by Dr. David Bellamy, better known as Botanic Man from his television series.

The youth programme includes lectures, workshops, films and excursions for Year 10-12 high school students.

PLAY REVIEW

by: D.H. CRAIG

"You haven't lived till you've tried a pair of wings!"

Aristophanes' The Birds is a feathered satire, an eagle-eyed look at humanity from Cloudcuckooland, the kingdom of the birds. The production of the play at the Drama Theatre, put on by the Drama Department and directed by Ian Watson, was a mixed affair. The world of the birds was well created: an ideal airy kingdom, on a raised platform in front of a brilliant pastel screen, populated by women metamorphosed by costume and movement into strutting, chirping, cooling birds of paradise.

The two human emigrants to Cloudcuckooland and later arrivals there were less convincing. Their words indeed had wings, to the point where the patter was simply bewildering. Perhaps this was just to reinforce the contrast between the lightsome, female world of the birds and the chattering antics of farcical humans and pompous gods. It was always a relief, in any case, to turn to listen to the Hoopoe (Susan Hall), the Lyrebird (Kathryn Gray) and the Eagle (Dimity Raftos). They delivered their lines with genuine authority. Later in the play, things did pick up among the humans when Pisthetairos (David Lammy) found more assured rhythm and his bird-brained associate Euphides (Robert Edmonds) took a breathless delivery to the delight of the audience; The Priest (Mike Robins) and the Prophet (Craig Shaw) had their comic moments, too.

There was a brave attempt to match the contemporary reference of the Athenian original - we had Prometheus celebrated as "the inventor of the barbecue", and Heracles seemed to have borrowed more than his striped blazer from one of our distinguished colleagues, but the slapstick abuse of the gods, calling Iris "tit-face" and skittling the aged Triballo, was really more fun. A light-hearted evening, and the bird jokes were by no means exhausted at the end.

(The Birds was presented at the Drama Theatre for a season which ended on August 8.)
OVERSEAS EXPERIENCE

As the life of the Medical School at the University lengthens, the number of medical students who spend their elective study terms overseas is steadily increasing.

In Ben Ewald's case he availed himself of the elective period to become involved in a research project in a village in Papua-New Guinea.

For about a month Ben, aged 23, was a resident of Gonoa, near Madang, and he worked on monitoring the incidence of malaria amongst the villagers.

Ben, who comes from Sydney and is one of the Medical School's foundation students, explained that his work was part of a Papua-New Guinea-wide Malaria research project being undertaken by local and Australian medical researchers, including Professor R.L. Clancy, of this University.

During his stay in Gonoa, Ben lived in a native house made mainly of palms and other bush materials. Unlike the other houses, his house provided him with the luxury of insect screens (it is owned by an Australian linguistics scholar who was away at the time).

Ben assisted the research project by evaluating the mothers' judgment of the body temperatures of their children.

Ben said that spending the elective term in Papua-New Guinea had provided him with opportunities to become involved first-hand in epidemiological studies and learn about progress being made in medicine. In the village, he also helped a Government paramedic, a New Guinean, to run the village aid post (basically, just a grass hut) and the baby clinic.

Apart from taking part in a research project, Ben learnt Pigin English - the only language link between all New Guineans and, "a fun language", Ben says.

Because he expects to conclude his five-year course at the end of next year and the curriculum remaining will leave him very little time, Ben can not see any opportunity to go overseas again for elective study.

Medical students from the University are encouraged to travel as far and wide as possible in their elective terms to experience alternative attitudes and approaches to problems. The main reason for this policy is that the Newcastle course is so different from the traditional medical education curriculum. Students have to pay for all travel expenses themselves.

---

Stellar Event

The annual P.S.A. dinner at which members of the non-academic staff of the University mix in a friendly atmosphere is just a week away. The evening will have the theme, "A NIGHT WITH THE STARS".

John Armstrong (Est. 328), Gary Jones (Est. 775) and Martin Ooms (Est. 777) have heard from some of those who intend to go to the dinner. Those who have not got in touch with them should do so before Tuesday, August 28.

The essential details of the 1981 dinner -

Place: The Southern Cross Lounge, The Union.
Date: Friday night, August 28.
Time: 7 pm.
Cost: $11 per person (includes pre-dinner drinks, dessert etc.)
Dress: Optional

Outstanding prizes will be provided for special activities during the evening.
Contest Winners

Four students of this University were among the 40 people who competed in the State Final of the Annual Japanese Language Speech Contest in Sydney on August 16.

David Langberg, a Japanese II A student, won First Prize in the Senior Division and Shawn Stevenson, a Japanese IIIB student, won Third Prize in the Open Division.

The contest was sponsored by the Consulate-General of Japan in Sydney, in co-operation with Japan Air Lines, the Australia-Japan Foundation and the Japan Foundation. Last year one of Newcastle University's students also won First Prize in the Open Division.

David Langberg will take part in the Australia-wide Grand Final in Sydney on September 13. The first prize will be a return air ticket to Tokyo.

Journey to Fame

The Hon. Mr. Justice J.F. Staples, a member of the Arbitration Commission, will be the guest speaker at this year's Union Dinner.

The dinner will be held in the Wistaria Room of the Union on September 18 at 7 for 7.30 pm. The cost will be $15 and $10 for students. The dinner will consist of a reception, a four-course dinner, dinner wines, port and cigars, liqueurs and coffee, after-dinner drinks and music supplied by Les and the Palm Fronds.

Those wishing to attend have been asked to get in touch with the Secretary/Manager of the Union by September 11.

ATTENTION - graduates from Hong Kong

The Department of Labour, Hong Kong, has written to the University and advised that it has set up special procedures to help Hong Kong students returning home seeking employment after graduation.

Would all Hong Kong students completing studies at the end of 1981 please call at the Careers and Student Employment Office - Room T25.

NIDA presents

TWELFTH NIGHT

by William Shakespeare

ARTS/DRAMA THEATRE

THE UNIVERSITY OF NEWCASTLE

August 25 - 29

BOOKINGS: University Union - 683 717
Civic Theatre - 21 977

Prices: $6, $4 students
In a preliminary report to Senate on word processing, the Deputy Vice-Chancellor (Professor L.N. Short) and Mr. J. Lambert and David P. Butler of the Computing Centre review current use of facilities available through the Centre and attempt to identify possible developments in demand. The report is based on responses to a questionnaire widely circulated in the University and is intended to provide basic information for a representative committee which will prepare recommendations on policy for the University.

In 1980 WORD-11 software was installed for use on the PDP 11/70 Computer. This was to provide a text-processing capability and to allow users to gain experience in its applications. The use of the system has expanded rapidly and the reason for the present investigation was the danger of overloading the central computer.

The inquiry revealed that there are two major areas of application of word-processing in the University requiring somewhat different approaches. The major administrative service divisions foresee an increasing and heavy demand for word processing facilities as a means to greater efficiency in their work and to allow them to cope with the increased workloads associated with reduced staff establishments. Those academic departments that have discovered the value of such facilities, essentially in relation to document preparation, seek easier access and, in many cases, extension of the capacity to handle a wide range of symbols.

Text Processing needs to be considered in isolation, but as one aspect of the more general issue of information processing within the University, the report says. "This is because it will have relations with other areas such as computing, communications, and typesetting for printed purposes."

The report says the principal problems identified by the replies to the questionnaire are:

- The response from the Word-11 system is poor at times when the RSTS/E system is heavily loaded. This is particularly noticeable by original Word-11 users who gained their first experience on a lightly-loaded system. The poor response is most obvious to experienced users who find that the display screen can be several lines behind their typing. Since the PDP 11/70 computer running the RSTS/E system cannot be expanded further, the only practical solution is to remove some of its load.
- There is a shortage of terminals at busy periods. The only way to ensure access to terminals is to have terminals other than those which are generally accessible. Both the number of terminals and the likely load can be assessed much more accurately for a dedicated text processing system, with strictly controlled access, than for an open access computing system upon which greatly varied demands are made.
- Word-11 is unable to handle scientific and mathematical notations. If a separate text processing system were to be obtained, then one which would handle such notations would be desired. It should be noted that this would limit severely the number of systems which could be considered, as most are designed for the ordinary office.
- There are difficulties associated with the printed output - in collecting it and specifying the typeface desired. Some of these problems are a result of the separation of the printer from the people preparing the text.
- Training of staff was also seen as an area needing some action.

It would appear that the major application in academic administration is the preparation of research papers, reports and theses, where material may pass through several drafts before completion. Already in some departments, higher degree students are using Word-11 facilities to prepare theses and there are obvious advantages in this, almost regardless of the subject.

If it is possible to give satisfactory service from the equipment and software available, it is to be expected, the report says, that academic departments will make increased use of word processing facilities for these and for general administrative purposes. The report notes the value of connecting word processing equipment to some form of phototypesetter, thus allowing the text to be prepared for offset printing with a variety of type-faces. The report proposes more detailed examination of:

- The general administration area whose needs would probably warrant the establishment of a stand-alone, multi-terminal text processing system.

It is probable that two different text processing systems would be required for these areas.

Many users are likely to require the inclusion of computer output within the text material. For this reason the possibility of communication between independent text processors and computers needs to be given weight as well as the capabilities of the text processors themselves.

On the request of Senate the Vice-Chancellor is to appoint a committee to carry the investigation further.

Vice-Chancellor

Professor David Caro, Vice-Chancellor of the University of Tasmania, has been appointed Vice-Chancellor of the University of Melbourne. He is expected to take up his duties on January 1, 1982.

Professor Caro succeeds Professor Sir David Derham, who has been Vice-Chancellor since 1968. Earlier this year Sir David Derham announced his intention to resign as Vice-Chancellor at the end of May, 1982.

Before becoming Vice-Chancellor of the University of Tasmania in January, 1978, Professor Caro was the University of Melbourne's first full-time Deputy Vice-Chancellor (from 1972-1977).
Film Festival returns

The Travelling Film Festival, which is presented in Newcastle every year with assistance from the Department of Community Programmes, will screen six films at the Civic on September 11, 12 and 13. The films were among the most popular films from this year’s Sydney Film Festival. They come from Switzerland, Spain, Democratic Republic of Germany, United States of America, France and Poland. The TTF has been touring Festival films for seven years, providing country audiences with ‘alternative cinema’ - world class films which do not get wide commercial distribution. All films will be presented in their original foreign language version with English subtitles. A subscription for the whole festival costs $15. This year’s Travelling Film Festival programme:

FRIDAY - 7.30 pm - The Boat is Full - Switzerland (Director Markus Imhoof).
- 9.25 pm - Beads of One Rosary -- Poland (Director Kazimierz Kutz).

SATURDAY - 5 pm - The Fiancée
- 8.15 pm - Blue Collar - United States of America (Director Paul Schrader).

SUNDAY - 5 pm - Mon Oncle
- 8.15 pm - Mama Turns 100 - Spain (Director Carlos Saura).

A scene from Renais' Mon Oncle D' Amerique, one of the films to be screened during the Travelling Film Festival.

Biblical scholar

Dr. James Cox, a specialist on ancient Mediterranean civilisation, will visit the University on September 9 to conduct a seminar for the Staff Bible Study Group. Dr. Cox will speak on Faith In the Messiah in the Gospel of St. John in Room S113 in the Social Sciences Building at 1 pm.

He is an American who specialised in the philosophical, political, social and religious history of the Mediterranean world from the period of Alexander the Great to Constantine. In order to handle the literature of the period, he attained proficiency in Greek (both classical and Hellenistic), Latin (both classical and ecclesiastical), Hebrew (both classical and Mishnaic/Talmudic), Aramaic (both Imperial and Middle), Syriac, Coptic, and, to a lesser extent, Ethiopic.

In 1973, Dr. Cox gained a Ph.D. with Distinction from Harvard University. He has completed work at many other universities, including an M.A. (Magna Cum Laude) from Andrews University and graduate work (Summa Cum Laude) from Johns Hopkins University.

Papers have been presented by him at a number of learned societies, such as the Seventh International Congress on Patristic Studies at Oxford University and the First International Congress on Coptology in Cairo, Egypt.

Dr. Cox is of the view that competency in academic areas should be complemented by a faith which gives meaning to life.

Further details can be obtained from Mr. Ron Gibbins, of the Department of Commerce. All members of the public and the University are welcome and would find the seminar of relevance to them, irrespective of their competence in Classics.

Offer of Co-operation

Dr. Tampubolon met the Deputy Vice-Chancellor, Professor L. Short, during his visit. During his visit to the University on August 6, Dr. D.P. Tampubolon, Educational and Cultural Attaché for the Indonesian Embassy, Canberra, met members of the academic staff and talked to three Indonesian students. Dr. Tampubolon came here mainly because he wanted to identify opportunities for cooperation between this University and universities in Indonesia. He met members of the academic staff whose research work includes aspects of Indonesian studies and learnt about how his Government might be of assistance to them.

Before taking up his present appointment in Canberra, Dr. Tampubolon was Deputy Vice-Chancellor of the Educational Institute at Medan in North Sumatra. He is a linguist and holds a Ph.D. degree in George-town University, Washington D.C., United States of America.
Computers on campus

Presented by the Department of Community Programmes in association with the University Computing Centre and the Faculty of Mathematics.

INTRODUCTION TO COMPUTING -

Eight sessions, commencing on September 15, Tuesdays 6 pm to 8 pm, Room V202 Mathematics Building. Conducted by Mr. Ian Smith, Computer Programmer. Course Fee: $25.

INTRODUCTION TO COMPUTING -

Eight sessions, commencing on September 16, Wednesdays 5.30pm to 7.30pm, Room V202 Mathematics Building. Conducted by Mr. David Firman, Computer Programmer. Course Fee: $25.

FURTHER PROGRAMMING IN BASIC -

Six sessions, commencing September 17, Thursdays 5.30 pm to 7.30 pm, Room V202 Mathematics Building. Conducted by Mr. Ian Smith, Computer Programmer. Course Fee: $25.

Visit by Asian expert

Dr. Evelyn Colbert is described by the Institute of International Affairs as "a highly-placed public servant and scholar in Washington". At the Newcastle AIIF Group's next meeting, Dr. Colbert will speak on Changing views of Asia.

The meeting will be held in the Staff House on August 25 at 6 for 6.30 pm.

In 38 years of studying Asia, Evelyn Colbert has seen evolutionary changes which she believes have permanently altered the political landscape of not only that area but the rest of the world.

The former deputy assistant Secretary of State for East Asian and Pacific Affairs will discuss those changes in a speaking tour which will take her to Wellington, Canberra, Singapore and Tokyo. She began developing her expertise in Asian affairs in 1943 when she joined the office of Strategic Services as a Japan analyst. She was hired by the Department of State where she has worked mainly as a policy officer in the Bureau of East Asian and Pacific Affairs.

Award

Coral Bayley-Jones, a University of Newcastle Ph.D. student, recently attended the conference of the Travel Research Association of the United States in Las Vegas.

Coral had received an invitation to the conference, travel and accommodation expenses and $300 for having won the TTRA's top award, the TTRA Travel Research Contest.

Coral is a Commonwealth Postgraduate Scholar in Geography. She received first place in the contest for her research paper in connection with urban areas as tourist sources - a field about which she has written widely.

More than 500 delegates from all parts of the world attended the conference in Las Vegas.

Since receiving the award Coral has travelled by bus from Las Vegas to eight universities in the United States and Canada, giving seminars and collecting research material for her Ph.D. thesis.

She is now in Britain and will visit a number of British universities, as well as attending the Third International Conference on Leisure-Recreation and Tourism in Cardiff, Wales, organised in co-operation with the University of Wisconsin.

Courses in tourism are apparently growing fast in North America and European universities, often associated with the Department of Geography.

Sculpture Exhibition

AN EXHIBITION OF METAL SCULPTURES BY SECOND YEAR STUDENTS FROM THE DEPARTMENT OF ARCHITECTURE WILL BE HELD IN THE FORECOURT OF THE AUCLMUTY LIBRARY FROM TUESDAY, SEPTEMBER 1 TO FRIDAY, SEPTEMBER 11
Mattara Poetry Prize

Dr. Paul Kavanagh, Lecturer in English, is organising the Mattara Poetry Prize for which the Hunter District Water Board has provided $500.

Prizes will be presented by the President of the Hunter District Water Board (Professor A. Carmichael) at the beginning of this year's Mattara Spring Festival and the Department of English will publish a collection of the 10 best entries under the title The Members of the Orchestra.

The winner of the Mattara Poetry Prize will be decided by a selection panel consisting of Professor A.D. Hope, of the Australian National University, Professor G.A. Wilkes, of the University of Sydney and Dr. Kavanagh.

Entries comprising a poem or group of poems of 100 lines or more were accepted for judging.

Dr. Kavanagh said some 300 previously unpublished poems were received from creative writers in all states of Australia as well as from the United Kingdom, India and Israel and that the entries have been of exceptionally high quality. The names of winners will be published in The Newcastle Herald and The Australian on September 12.

SERVING NEWCASTLE'S SONS & DAUGHTERS

Public support for the University goes back further than many would think.

When University Library staff were recently sorting early records from the Newcastle Trades Hall Council, they found that in April 1943, Mr. N.R. Mearns (Headmaster, Newcastle Boys' High School) and Mr. Paul Hayes addressed the Trades Hall Council on the subject of a University Library for Newcastle and sought union support.

The minute book shows that the Trades Hall Council then resolved that all Unions be circularised stressing the importance of the Library and suggesting that each unionist contribute from his pay-packet one shilling during the year 1943.

The Council considered that there was an urgent need for University facilities in Newcastle at the time "to serve the sons and daughters of those on low incomes who would be able to take up courses if they could live at home, but cannot afford to board in Sydney. There (was) also the adult class, who, whilst working, wish to further their studies at night ... ."

Many unionists who wanted a University education for their children gave much more than a shilling. A former reporter on the Newcastle Morning Herald staff, Mr. P.A. Haslam, of Hamilton, can remember giving one pound.

The Federated Engine Drivers' and Firemen's Association was enthusiastic and struck a voluntary levy "to be collected as early as possible". Likewise at Carrington, members of the Coal and Coke Shipping Union "were quite pleased with the idea and that the suggested (one shilling) levy would be quite in order".

By July, 1943, forces were building up to obtain University facilities in Newcastle. The Trades Hall Council and unions formed a deputation together with other Newcastle groups to make representations to the Premier for the establishment of University facilities.

It was a good try. But Newcastle had to fight for another eight years before University courses became available through the University College at Tighes Hill.

Referendum

The Staff Association recently held a second referendum on the proposal that the Federation of Australian University Staff Associations affiliate with the ACTU.

FAUSA had asked that the matter be reconsidered prior to its annual general meeting.

The Secretary of the Staff Association (Mr. P. Chopra) reported that the referendum had resulted in: For affiliation 104 votes, Against 106, Informal one.

In the first referendum on the question held last year the result, Mr. Chopra said, had been: For affiliation 95, Against 100.
Commonwealth awards

Application forms and information on this scheme is presently available from the Student Administration Office (Wayne Rigney Extension 303). Candidates must be Australian citizens or furnish proof of an application for citizenship at the time of application.

The awards are competitive and are tenable at institutions of learning in all Commonwealth countries. The awards are for study or research, normally for a period of two years and towards the award of a university degree or similar qualification.

The emoluments are for expenses of travel, living and study costs.

Closing dates at the Secretary's Office, University of Newcastle.

for study in SRI LANKA (September 1)
for study in UGANDA (November 1)
for study in ALL OTHER COUNTRIES (October 1)

Advertisements

POSITION VACANT

TUTOR - Japanese girl is seeking a tutor for Mathematics and English for her Higher School Certificate. Fees negotiable. Student has her own transport to travel to the tutor's home. Anyone interested should contact Dr. K. Ono, Japanese Section, Department of Modern Languages, Extension 414.

DISPOSAL OF EQUIPMENT

The following surplus and obsolete items of equipment and furniture are available for disposal by tender.

Six - Electric Adding Machines; three - Gestetner Ink Duplicators; one - Rex Rotary Spirit Duplicator; one - Rex Rotary Electronic Stencil Cutter; Five - Nashua Savin 220 Photocopiers; Six - 3M Photocopiers; Five - IBM Electric Typewriters; Two - Olivetti Electric Typewriters; Two - Manual Typewriters; Kodak Microfilm Camera and Reader; One - Paper Guillotine; One - IBM 029 Computer Card Punch; One - Console Lap Polishing Machine with Rotating Specimen Holder; 4 x 27 Drawer, 1 x 6 Drawer and 1 x 4 Drawer Punch Card Cabinets; Sundry Filing Cabinets, Clothes Lockers, Classroom Tables and Stacking Chairs, Dictating and Intercom Systems, PH Meter, Trip Balance etc.

For further information, and itemised Tender Forms can be obtained by calling at the Purchasing Section, Room 157, McMullin Building, or by telephoning Extension 372 or 371. Tenders must be forwarded in a sealed envelope marked "TENDER FOR USED EQUIPMENT", to the Purchasing Section, and will be accepted until 11.30 am, September 2.

FOR SALE

1972 AUSTIN KIMBERLEY - Manual, goes well, has excellent body and interior. New tyres. Registered until February, 1982. $1,200 or near offer. Please telephone 57 5944 or 52 7411.

1951 CLASSIC MK 7 JAGUAR - 99% restored. Mechanically A1, paintwork (Bronze). NO RUST!!, all timber finishes fully restored. (Needs interior hood lining - now available) plus spares. URGENT SALE - $5,500 or near offer. Please telephone 57 5257.

VULCAN TANGI - three speed, blow heater. Also has fan position for cool air. (Hardly used) $17. Please telephone Extension 649.

FORD FAIRMONT XW, 302 four speed manual, mag wheels, goes well and looks good. $1,500 or near offer. Please telephone 48 8482 or 48 9284.

21' MILLARD CARAVAN, island bed, full stove and frig., separate rooms. Aluminium annex, carpeted, round table and four chairs, nite & day, built-ins. On site Salamander Bay. $7,500, price includes crockery and cooking utensils. Please telephone Extension 581 or 63 3247.

REUNION

The successful reunion last year of former Lysaghts Bowling Club members and employees has prompted a repeat this year at Mayfield Bowling Club on September 20. Fred Walker has information at 22 201 or 75 1081.

University NEWS is published on a two-weekly basis in the Secretary's Division for the Editor, The Secretary, The University of Newcastle. Stories and items should reach Mr. John Armstrong and Mrs. Linda Aurelius, C/- Room 057 or Room 066 in the McMullin Building by 5 pm on the Thursday before the publication date. Third Term publication dates are: August 20, September 3, September 17, October 1, October 15, October 29, November 12 and November 26.
