Vacancy Filled

Professor Dutton

As a result of the ballot to elect a professor to the casual vacancy on Council caused by the resignation of Professor J.F. Burrows, Professor K.R. Dutton, Professor of French, has been elected.

Professor Dutton, whose term of office will run until June 30, 1980, previously served on Council during 1975 and 1976 at which time he was also Deputy Chairman of the Senate.

Map Week 79

Find out about maps ... how they are created ... get a map and get moving. These and other slogans will be widely heard during Map Week, from September 8 to 15.

To promote an understanding of maps and encourage members of the public to make greater use of them, an exhibition will be held in the foyer of the Department of Geography during Map Week. On Saturdays, September 8 and 15, it will be open from 2 pm to 5 pm and the hours on week days will be 9 am to 5 pm.

The exhibition will be a joint effort by the New South Wales Central Mapping Authority, of Bathurst, and the Department of Geography.

Sample bags of maps will be available for visitors to buy for $2 each.

It is notable that Map Week coincides with the special events to commemorate the Geography Departments Silver Jubilee.

Most Australians have seen a Gregory's, but it seems that few people know who is responsible for mapping and how maps are made.

The Department of Geography has developed a map library that is one of the most important in New South Wales. The library has been operating as long as the Department itself, that is for a quarter of a century, and in that time it has been built up into a grand collection of around 25,000 maps.

After its establishment in 1954, the map library gained an added boost as a consequence of the interest and enthusiasm shown, by Mr. W.F. Geyl, who came in 1957 and retired in 1978.

The map library was located in the Arts/Administration Building after Geography moved from the old site at Tighes Hill to Shortland. When the Geography wing in the Social Sciences Building was completed it was transferred to the top floor (Room R205).

The present map collection subdivides into topographical maps (showing man-made features, water ways, contours, vegetation etc.), thematic maps (giving data about particular aspects - population density, planning zones, weather patterns, etc.) and maps of countries of the world.

Aerial photographs of parts of the Hunter Valley, a fascinating stock of atlases and research theses written by students are also on hand.

There are a number of map making organisations in this country, including Commonwealth and various state mapping authorities, the R.A.N., the Army, etc. Most are represented on the National Mapping Council, whose function is to plan and co-ordinate the co-operative mapping enterprise.

On a New South Wales level the main map making organisation is the Central Mapping Authority, from which the Department of Geography obtains much of its stock.

In addition to all staff and students of the University, members of the community are able to make use of the library by appointment.

Geography staff involved in collecting and making maps are Mrs. Myra Graham, Map Curator, Mr. Laurie Henderson, Cartographer, Mr. Brian McEwan and Philip Reynolds, Cartographic Draughtsmen.
2NUR-FM Decision

The University is to reduce its commitment to the operations of radio station 2NUR-FM because of the general financial problems faced by the University.

This announcement was made by the Chairman of the Radio Station’s Committee of Management (Professor L.N. Short), who revealed that staff for the control of 2NUR-FM would not be provided after 1981. However, he added, the University hoped that the response of the community groups, business enterprises and individual citizens would be such as to ensure the future operation of the radio station.

In January, 1977, the University Council agreed to the establishment of an educational radio station, for which it had been offered a licence by the Minister for Post and Telecommunications. Studios and office accommodation were provided by the University and an agreement was entered into with Newcastle Broadcasting and Television Corporation Limited (NBN) for transmission facilities. The station commenced broadcasting in March 1978.

Following changes in the Broadcasting and Television Act, the Minister invited applications for a new type of licence for an FM radio station in Newcastle, to replace the licence held by the University. After a public inquiry, the licence was issued to the University, there being no other applicants.

Since September 1978, Radio 2NUR-FM has operated as a community broadcast station and has established a significant place in the services available to the Hunter Region.

Professor Short pointed out that in recent months it had become apparent that the University was facing a serious problem and must concentrate its resources in those areas directly concerned with its teaching and research functions. “All aspects of the University’s operations are being reviewed and savings effected where possible”, he said. “In particular it has become necessary to reduce the University’s commitment to the support of the radio station, which at present is costing about $75,000 per annum”.

The University intended, he said, “that every effort should be made to continue the operation of the station, but that gradually responsibility for funding should be transferred to other sections of the community. By giving notice of its intentions, the University hoped to minimize any disruption of the development of the station.”

Professor Short explained that at the end of 1979 one member of the full-time staff of 2NUR-FM, who was on secondment from another department of the University, would return to his normal work. The University would provide the Station Manager and Secretary and normal operating expenses for 1980.

“Staff will not be provided in 1981, but the University will provide the use of the present studios, offices and transmission facilities throughout 1981 subject to the negotiation of arrangements that allow the licence to be maintained. The position will be reviewed again not later than August to determine conditions to apply from the end of 1981,” he said.

There was growing evidence of community support for 2NUR-FM and it was with great reluctance that the University had initiated these moves.

LETTERS

Dear Sir,

The simple answer to Mr. Robertson’s first question (Letters, August 23) is that personnel staff could not be spared from their work.

It is possibly not widely known that the majority of the administrative units are sharing in the staffing cuts that are being made across the University. The Personnel Department currently has two positions frozen.

I had assumed that in recent months the general picture about the University’s financial position had become known to staff generally.

The consequent staffing cuts must inevitably lead to reduction of services in many areas. I would dearly like to extend personnel services to include such items as “staff development and training” but just to maintain the existing level of support is difficult.

We do give advice on superannuation matters and retirement benefits etc. The New South Wales State Superannuation Fund organises, on a regular basis, retirement seminars - and the greater majority of our staff who contribute to superannuation are contributors to that Fund. (Special leave is granted to members of staff to attend these seminars.) A duplication of efforts would be unworkable. In any case, my view is that “planning for retirement” is not a personnel function.

The final question that was asked was - what is the function of the Personnel Department?

The functions (plural) are as follows (this is not an exhaustive list):

- Recruitment of academic and non-academic staff, including advertising, setting up selection committees, correspondence, etc.
- Salary administration including maintaining leave records and personal files, arrangements for payment of increments, special allowances, annual leave loadings, etc.
- Maintenance of a multitude of staff statistics, and information.
- Industrial relations work, including negotiation with unions, representing the University in industrial courts and at a number of meetings with other bodies and universities in connection with the personnel and industrial relations work of the Department.
- Investigation of non-academic promotion matters and staffing policy generally.
- Advising Heads of Departments and staff on personal matters and staffing policy.
- Induction of new members of staff and assistance to them on a continuing basis.
- Counselling staff on their employment including advice on “grievances”.
- Responsible for the Central Records Registry, the Central Switchboard, the Patrol Staff and security and parking matters on the University campus.

Seeing that I have been tempted into entering the public arena, may I mention that ALL members of the Personnel Department are more than willing to give advice and assistance to members of staff (on personnel matters only, of course). We’re even prepared to listen to criticism, and would actively solicit any suggestions that could improve our efficiency.

MIKE COWILL,
Personnel Department.

Dear Sir,

Good news! - the income tax department, which had classified my sabbatical as a private pleasure, has seen the error of its ways.

I do NOT have to pay them a sizeable amount - (Four hefty figures) in more tax, but I have also received a refund cheque for a few more dollars I thought I was entitled too.

VERANE RUDKIANSKY O’BYRNE.
They Like Coming Back

Professor David Miller, distinguished geographer from the University of Wisconsin – Milwaukee, is often described as "a permanent visitor" to the University. This remark is elicited by the fact that he is currently visiting Professor of Geography for the third time.

"Newcastle University is our second home", Mrs. Enid Miller commented to University News.

Professor Miller has made an international reputation in hydrology and energy processes. His academic career has been based in Milwaukee in the United States Mid-West, but he has taught hydrology, physical geography, climatology and meteorology at the University of Georgia, the University of California, the University of Wisconsin – Madison, the University of Hawaii and Macquarie and Newcastle Universities. He has held numerous research positions, including one at the U.S.S.R. Academy of Science in Moscow, and served on several professional committees.

Looking back on a long friendship with Professor Miller, Professor Tweedie explained that they met when he was visiting the University of California at Berkeley in 1962 on a Carnegie Study Grant. Professor Miller, a Berkeley graduate, was then attached to the Forest and Range Experiment Station. Both men were working on research in the general field of fresh water and by deciding that they would exchange reprints and maintain a dialogue they established a collaboration which has been continued since that time. They have forged close personal, as well as fruitful academic, relationships.

Professor Miller, who had previously developed an interest in rainfall in Australia, first visited this country in 1960, under the auspices of the Fulbright Fellowship Scheme. He was attached to the Department of Geography, which had just moved from its old site at Tighes Hill to Shortland, and during his stay he combined teaching with research in hydrodynamics.

Professor Tweedie and Professor Miller nominate this as a most satisfying period for each of them. As Head of the Department of Geography at that time, Professor Tweedie believed that the visit had a major impact on the programme of teaching in his Department. The cross-fertilization of ideas cultivated then produced two books, Water and the World (Nelson), by Professor Tweedie, and Water at the Surface of the Earth (Academic Press), by Professor Miller.

There is another reason why Professor Miller's 1966 visit is remembered – the Leisure Reading Collection in the Auchmuty Library. This was a gift from the Millers. "We were inspired by the Browsing Room in the Library at the University of California at Berkeley, which students regard as a 'lifesaver'", Mrs. Miller said.

When Professor Miller came to Australia on the second occasion (in 1971), he divided his visit between Newcastle and Macquarie Universities and the CSIRO Division of Plant Industry in Canberra.

Professor Tweedie had been to the University of Wisconsin in 1968, returning David Miller's visit, and, in 1972, they were associated again at the International Geographical Congress in Montreal, where Professor Miller's Russian contacts proved to be useful.

That the Millers hold this University in high regard is attested to by the number of visits. They will leave on September 11 having confessed to University News that they would welcome a chance to make a fourth visit.

The campus at Shortland was exceptional in one obvious respect – the sheer beauty of the setting and the plan, they said.

FOOTNOTE: One of the events which marked the 25th Anniversary of the establishment of the Department of Geography was the conferring of an honorary degree on Professor Miller. He and Mrs. Miller have delayed their return to the United States to allow them to go to the Jubilee dinner on September 7.

Mr. Grassbys Visit

The Hon. A. J. Grassby is to be guest speaker at this year's Union Dinner, which will be held in the Southern Cross Lounge on September 21 at 7 pm for 7.30 pm. The charge to attend is $10 or $7.50 for students and tickets are available from the Union.
Funding for 1980

The Tertiary Education Commission has released the Council's report of its recommendations for the funding of universities in 1980. Recurrent grants (general operating funds) for 1980 were approved last year following the decision of the Government to return to fixed triennial funding for these grants. The latest report therefore deals with only capital and equipment grants.

The Commission has made no allocation of funds for new university building projects to commence in 1980. Among the continuing projects, $2,550,000 (December 1978 cost) has been allocated for clinical teaching facilities associated with the Newcastle Medical School. This leaves a further $1,088,000 required for completion of the project.

For minor works and services, the University has been allocated $570,000 (December 1979 cost levels) compared with $300,000 (December 1977 cost levels) for 1979. This represents a substantial reduction (about $100,000 in real terms), and one that must limit the possibility of undertaking some of the projects required to ease problems caused by the continuing deferment of major building projects.

The allocation to the University for equipment is $1,110,000 including equipment grants totalling $570,000 for the Medical School ($509,900 for equipment; $61,000 for library materials). For general university purposes the grant is $504,000 (December 1978 cost levels) compared with $610,000 for 1979. This reduction of about 13% in the value of equipment funds available in 1980 will present problems for the University.

The high level of equipment funding for the Medical School represents a response to the University's request that a greater proportion of the initial establishment grant be paid in 1980 to allow the purchase of equipment for the Clinical Sciences Building.

M.H. Cates and Professor Merriiles have a recurrent general recurrent grant for 1980, which would be $18,248,000 (including $2,074,000 earmarked for the Medical School). The amount for general university purposes is $151,166.666 (at December 1977 cost levels) which represents a reduction of 0.58% on the corresponding amount for 1979.

Microscopical Society

Microscopic technology was put under the microscope at the University from August 27 to 29. The occasion was the Fifth Annual Conference of the Microscopical Society of Australia, which involved around 50 delegates.

In addition to practitioners of microscopy from the University itself, other universities, colleges of advanced education, technical colleges, the CSIRO and government laboratories and private companies sent representatives. Their main professional interest lay in the bio-medical sciences, the earth sciences and metallurgical industry.

Following the official opening by the Dean of the Faculty of Medicine, Professor G. Maddison, the conference divided into the four sessions.

In addition there were exhibitions of equipment and posters, a conference dinner in the Staff House, a coach tour of the Hunter Valley vineyards, including a dinner at Pokolbin Cellars, and a micrographic competition.

The venue for the conference sessions and the exhibitions was the Medical Sciences Building on campus. The Faculty of Medicine, the Departments of Metallurgy and Geology and the Central Research Laboratories at Shortland played a big part in the proceedings.

Professors Berryl Nasher and Eric Hall and Assoc. Professor R. Barry were chairpersons at individual sessions.

Mr. Milton Merriiles, retired Newcastle Herald photographer, was guest speaker at the Staff House dinner. He demonstrated historic photos and cameras and spiced his presentation with anecdotes from a news photographers career. Mr. Merriiles and Professor Nasher were judges for the micrographic competition.

Grants Stopped

The Minister for Foreign Affairs has advised the Chairman of the Australian Vice-Chancellors' Committee that he has decided that the Australian Development Assistance Bureau (ADAB) will cease to pay grants in aid in respect of each postgraduate student placed under Australian aid programmes. The grants will not be paid as from January 1, 1980.

Appointment

Mr. B. Hanks, who graduated with a Bachelor of Commerce in April, 1979, has gained an appointment and Industry Promotions Officer - New York, with the Premier's Department of the Government of New South Wales.

Mr. Hanks will move to New York in the next few months and will be there initially for a period of three years. He currently is Executive Secretary to the Small Business Development Council of New South Wales.

Remedial English

At its last meeting the University Council submitted its report to the two student members, Mr. S. Date and Mr. M. Zammit, for the purpose of assisting students who were having difficulties with English expression.

The Council, after discussion, referred the matter to Professor M.P. Carter for report.

Scholarship

One scholarship is being offered for world-wide competition for graduates wishing to undertake an approved course of postgraduate study in the field of Social Security leading to a higher degree or diploma of a University. The scholarship is to provide financial assistance for postgraduate study in the "International Comparative Study of the Field of Social Security".

The value of the scholarship will depend on costs of study in the country nominated by the successful applicant.

Further information is available on request from the Office of the Vice-Chancellor, Administration Office. The closing date for applications is September 30.

Courses On FM

An innovative use is being made of Radio Station 2NUR-FM by the programming of a series of 10, one-hourly, broadcasts on Educational Administration. The series, co-ordinated by Dr. Ross Telfer of the Faculty of Education, is a funded in-service course approved by the Regional Instructional Committee and is organised through the University's Department of Community Programmes.

Each of the 10 broadcasts is to be presented by a postgraduate student enrolled in the Bachelor of Educational Studies degree programme and specialising in the field of Educational Administration.

Notes and reading lists are being prepared in conjunction with these broadcasts, and may be obtained from the Teachers' Centre at Adamstown, or from the Faculty of Education office at the University.

The topics covered by the broadcasts include Leadership Style in Schools, School Climate, The Obstacles of Communication, An Alternative Model for Technical Education, Change and Innovation in Schools, Community Involvement and School Health. The broadcasts will be taped and will be stored for future use.
Aboriginal History

A valuable link between the local coal industry and Convocation was established at an informal function at the University at which the General Manager (mining) of R.W. Miller and Co. Pty. Ltd., Mr. Peter Murray, presented a cheque for $1,000 to the Warden, Mr. Brian Relf, to further aboriginal research being undertaken by Mr. P.A. Haslam, Convocation's first Visiting Scholar.

In 1977, Mr. Murray agreed that Mr. Haslam should survey his company's mining area at Mount Thorley, near Singleton, for aboriginal sites.

Mr. Haslam said the area was the tribal territory of the Nanamara aborigines for thousands of years. Generally, the company's site had been well used for grazing and other rural pursuits that all surface evidence of occupation had disappeared.

Mr. Haslam was accompanied by Mr. A. Bartram, a graduate biologist attached to the staff of James B. Croft Environmental Consultants. In one small area they found a "tree workshop", that is, a place where nomadic bands of aborigines had cut strips of bark to provide crude and temporary shelters. There remained an aboriginal barking tree trunk, with a clearly-marked cut used for that purpose.

The company had agreed to mount it on a cement pedestal, place it in a suitable spot for visitors to see and, on an appropriate occasion, have a plaque unveiled by an aboriginal boy speaking both mother tongue and English.

Mr. Murray was accompanied by Mr. Ted Davies, who is in charge of the company's mining development at Mount Thorley.

At the presentation, Mr. Murray, who is National Chairman of the Australian Collieries' Conservation Committee, announced that a levy of half a cent a tonne on coal production had been struck to yield $115,000, which would be spent on educational projects associated with conservation and environmental issues.

He said the coal industry recognised that research into aboriginal culture in the Hunter Valley was necessary.

Mr. Relf said Convocation was delighted to have been the agent to establish such an important link with the coal industry, which had its own special importance in the national scene.

Convocation believed that it had an important task to discharge in providing a functional communication between the community and University. It was happy to have initiated a new and exciting level of research into aboriginal history.

Dr. Cliff Hanna, of the Department of English, representing an editorial committee which is examining Mr. Haslam's work so far completed, said it had been agreed that the history should be published in two volumes. The first would deal with legends, myths, spirit life and initiations. It could be on sale in a short time.

Mr. Murray was accompanied by Mr. Ted Davies, who is in charge of the company's mining development at Mount Thorley.

The money provided by R.W. Miller will be used by Convocation to make a start on the publication of two books dealing with aboriginal history and culture in this region.
Jonah Opens

Ken Harper (left), as Jonah, and David O'Halloran, as Pash, in Terry Clarke's world premiere production of 'Jonah', adapted by Newcastle playwright, John O'Donoghue. The play opened in the Drama Theatre on September 5. A three-week season concludes on September 22. Photo: Tony Rapson-Coe.

Hospitality Problems for Colleges

Miss Robyn Parkins, of Quirindi, has offered to host overseas students during University vacations. Quirindi is situated in the Central Tablelands of New South Wales, in a particularly beautiful part of Australia. Miss. Parkins, who has travelled widely in Asia and Europe herself, offers the prospect to students of getting to know this part of the world, visiting stations and seeing and becoming involved in rural activities and pastimes available in the area.

Students who are interested in following up Miss. Parkins' generous offer are asked to contact Peter Bamford, University Counselling Service, Lower Ground Floor, Administration Building.

Residential colleges at provincial universities appear to be facing a deteriorating occupancy situation because student numbers at the universities are falling.

This view was expressed by the Warden of Edwards Hall (Dr. Michael Blackmore) after he had attended the biennial conference of the Australian Association of Heads of University Colleges and Halls at Union Hall at the University of Queensland.

Dr. Blackmore revealed that a college at the University of Tasmania (Ena Waite College) would close at the end of this year and it was highly probable that two or three colleges at other provincial universities would be forced to close during 1980.

Dr. Blackmore is the new President of the Australian Association of Heads of University Colleges and Halls. Previously Treasurer, he will hold office until August, 1981.
Film Festival

The Travelling Film Festival, offshoot of the Sydney Film Festival, takes to the road again in September.

It is now six years since the Director of the Sydney Film Festival, Mr. David Stratton, decided that country centres were sadly lacking in recent high class world films and initiated a scheme to provide country audiences with short seasons of films of this sort.

The Travelling Film Festival has aroused a lot of interest in Broken Hill, Lismore, Wollongong, Albury, Shepparton, Bowral and Newcastle and has been helped out by applications that are lodged with finances by the Creative Development Branch of the Australian Film Commission and the Cultural Activities Branch of the New South Wales Government.

In Newcastle, the Department of Community Programmes, radio station 2NUR-FM, members of the University's staff and other interested people will give assistance.

Newcastle is the first centre visited by the Travelling Film Festival. This year six feature films and a selection of shorts from the 1979 Sydney Film Festival will be screened. The features were among the Top 10 in the popularity poll conducted amongst subscribers at the end of the Sydney Festival.

The Night The Prowler, based on a story written by Patrick White and directed by Jim Sharman, will be screened. Kerrie Walker, who acted the Hunter Valley Theatre Company, has a leading role in the film. Movie Move, made by the distinguished Hollywood director Stanley Donen, will only be shown in Newcastle.

This light-hearted piece of nostalgia is divided into two halves, like the old Saturday afternoon matinées, and stars George C. Scott.

Other films to be screened:
- KNIFE IN THE HEAD, MARRIAGE OF MARIA BRAUN, from Germany, TO MY BELOVED, which comes from the USSR, and a film from Claude Sautet, the French director, A SIMPLE STORY.

Tickets can be bought at the Union and the Civic Theatre.

Housing Loans

Each year the State Superannuation Board of New South Wales allocates funds to terminating building societies for the provision of housing loans to borrowers who are members of the State Superannuation Fund. Advances are made by the societies at a concessional rate of interest.

With a view to streamlining application procedures for the benefit of future borrowers under the scheme, the State Superannuation Board has recently approved of the adoption of a computer based system, which will be implemented and maintained by the Association of Cooperative Building Societies of New South Wales Ltd., and used as the basis for the future allocation of housing loans to Fund members.

Details of all applications presently on hand with the building societies currently involved in the administration of the scheme and all future applications that are lodged by intending borrowers, are to be amalgamated into a Central Loan Request List. All existing applicants whose applications are currently included on an individual society's waiting list, will shortly receive and application form for admission to Central listing and the prompt return of this form will ensure the preservation of each applicant's existing order of priority under the Scheme.

Under the revised arrangements, a non-refundable fee of $10 will be charged at the time of lodgement of each application, to cover the costs incurred by the Association in processing the forms and maintaining the Central Loan Request List.

Forms are now available at the offices of each of the participating societies and Fund members, who are desirous of obtaining home finance in the future and who are not already included on an existing waiting list, may obtain an application form by contacting one of the Secretaries involved. The names and addresses of the metropolitan and country based groups which administer the Housing Loan Scheme, are obtainable from the Board's Office (telephone: 236 2470).

Stenographers

The Management Committee of the University's sub-division of the Public Service Association will hold a meeting of stenographers in Lecture Theatre B01 on Tuesday, September 11 at 12.30 pm. The Committee will discuss the University's proposal to appoint a Departmental Secretary in the Department of Modern Languages. The Committee envisages that the appointment could have undesirable consequences in other Departments and is interested in the views of stenographers.

BRIAN KELLEHER, Secretary

New Book

Professor C.A. Tisdell, Professor of Economics, is the author of a book, Economics In Our Society, just published by The Jacaranda Press.

The text has been designed for use by students of economics in Australian schools and also by any individual who wishes to be introduced to economics as a part of everyday living.

Economics In Our Society covers material in the Year II syllabuses of all states and provides an introduction, or bridge, to several important topics covered in Year 12.

Appointments

Miss K.L. Mortimer, Clerk, with the Secretary's Division.

Miss U. Scully, Junior Laboratory Assistant, with the Department of Biological Sciences.

Mr. G. Weber, Professional Officer, with the Electron Microscope Unit.

Mr. K.H. Daniel, Computer Programmer with the Computing Centre.

Mr. G.D. Gordon, Assistant with the Secretary's Division.

Miss A.M. Lynch, Junior Laboratory Assistant with the Faculty of Medicine.

Mr. J.S. Reeve, Research Fellow with the Faculty of Mathematics.

Resignations

Mr. C.A. Aitcheson, Patrol Attendance, with the Bursar's Division.

Miss N.F. Barden, Computer Operator with the Computing Centre.

Mr. F.W. Grosberg, Clerk with the Bursar's Division.

Dr. R.R. Piggott, Senior Lecturer with the Department of Economics.

Mrs. G.M. Reynolds, Infant Nurse, Child Care Centre.

Mrs. J.J. Stones, Stenographer with the Department of Civil Engineering.

Mr. G.M. Turnbull, Tutor with the English Department.
Diary of Events

FRIDAY, SEPTEMBER 7
2.00 - 3.20 p.m.
Seminar on Brittle Fracture: From Griffith to the Present State of the Art held by Dept of Civil Engineering (Guest Speaker: Dr B.L. Kirtharohan) in Room ERG01 of Engineering Complex

SUNDAY, SEPTEMBER 8
Map Week.

MONDAY, SEPTEMBER 10
2.00 - 6.00 p.m.
Geographical Society Seminar entitled Coal Resources in the Hunter Valley in Lecture Theatre H02. Guest speakers - Dr Britten from the Joint Coal Board and Mr Noble from the Trade Hall Council. Wine provided. All welcome.

6.16 pm
Meeting of the Board of Management of the Union.

6.30 p.m.
Film. Death in Venice. FREE

TUESDAY, SEPTEMBER 11
7.30 p.m.
Dave Van Kriedt Band. Stan's Bar. FREE

WEDNESDAY, SEPTEMBER 12
8.30 p.m.
Concert Dutch Tilders. Students with I.D. cards $2.00. Others $3.00.

THURSDAY, SEPTEMBER 13
1.05 p.m.
Film. Henry V (Olivier version, colour) - screened by the Department of English. This film is part of the programs for English II students, but other members of the university are most welcome to attend.

8.30 p.m.
AT HOME WITH PHOENIX

FRIDAY, SEPTEMBER 14
The Union, with the Maryville Jazz Band. Dress formal.

SATURDAY, SEPTEMBER 15
The Dept of Community Programmes In association with Newcastle College of Advanced Education presents The Second Series of Constructive Play and Exercise for Very Young Children at the Newcastle CAT Gymnasium. (Saturday mornings)

MONDAY, SEPTEMBER 17
Dept. of Community Programmes' development course for people in business, commerce and industry.

MANAGEMENT DEVELOPMENT, eight sessions commencing Sept. 20, conducted by Dr. J. M. Wood.

TAXATION AND THE SMALL BUSINESS, six sessions commencing Sept. 17, conducted by Miss Jillian Phillips.

INTRODUCTION TO COMPUTING, eight sessions commencing Sept. 18, conducted by Mr. B. Cheek.

FURTHER PROGRAMMING IN BASIC, six sessions commencing Sept. 20, conducted by Mr. B. Cheek.

MANAGERIAL PSYCHOLOGY, six sessions commencing Sept. 18, conducted by Dr. M.E. Spautz.

MONDAY, NOVEMBER 13
TO

MONDAY, OCTOBER 1

FRIDAY, SEPTEMBER 28
4 pm
THE 1979 RESIDENTIAL POETRY WORKSHOP, Huntington House, Terrigal, presented by the Department of Community Programmes and the Hunter Region M.E.A.

SATURDAY, SEPTEMBER 29
6 pm
The Margaret Barr Dance - Drama Group. DIRECTOR: A. J. Grassby. Special production: Margaret Mead.

Printed in the Secretary's Division, the University of Newcastle for the Editor, The Secretary, The University of Newcastle. N.S.W. 2308.
