RESTRICTION PLACED ON THEATRES

The capacity of separate lecture theatres erected at the University is to be confined to a maximum of 200 seats and they are to be fully air-conditioned.

On the recommendation of a Committee which was set up to investigate and report on the most desirable size of lecture theatres, the University Council agreed to this planning objective on July 16.

The suggestion was also made to the Vice-Chancellor that he consider constraining future class sizes to not more than 200 students.

The Committee reported that the best results could not be achieved in lecture theatres under trying conditions caused by excessive cold, heat or humidity.

For this reason, it also recommended that the major lecture theatres (B01, H01, P01) be air-conditioned as early as possible and that, as finances permit, other lecture theatres be air-conditioned.

The Committee gave considerable thought to whether the maximum capacity of lecture theatres would be 150 or 200. It agreed that 200-seat theatres were both financially practicable and educationally satisfactory provided they were fully air-conditioned.

The Committee also recommended that an estimated $4,000 worth of improvements be carried out in Lecture Theatre B01.

The University of Newcastle has 18 stepped lecture theatres. They are: Drama Theatre (P01) 275 seats, Main Lecture Theatre (B01) 252, Basden Theatre (H01) 250 seats, Engineering Theatre (Building F) 200, Science Theatre (E01) 200, Social Sciences (R04) 80, Social Sciences (R02) 146, Social Sciences (S02) 100, Mathematics/Classrooms Building (T) 120 seats each, Physics Building (D) (G08) 94, Chemistry Building (G) (G05) 86, Biological Sciences Building (J) (LG08) 70, Engineering Building (EA) (G01) 100.

Plans for the Medical Sciences Building provide for an air-conditioned lecture theatre with a seating capacity of 120. P01, E01 and LG08 in the Biological Sciences Building are already fully air-conditioned.

Dr F.O.J. Purdue, Convenor of the Committee, in a report to the Council said that universities did not observe a universal standard in relation to lecture theatre size. At four universities the size of lecture theatres ranged from less than 150 to between 400 and 500.

The Director of the Higher Education Research and Services Unit had reported that, in some circumstances, unamplified speech was practically inaudible, and sight of blackboards and projections was difficult at a distance of more than 9.16 metres.

This might suggest that the dimensions of the theatres should be such that they would not seat more than 100. An experiment had also indicated that the frequency of errors in note-taking by students was greater for those sitting more than approximately eight metres from the lecturer than for those sitting closer.

Dr Purdue stated that the deficiencies in B01 (the oldest theatre) related to the blackboards, the overhead projector screen, the public address system and microphone, the acoustics, the overhead projector, the lecturer's bench, the ventilation system and the noise therefrom.

In addition to the improvements to B01 costing approximately $4,000, the Committee favoured more extensive alterations in the theatre including the re-arrangements of seating and aisles, when funds permit.

The University Council agreed to all the Committee's recommendations.

The Committee which investigated the University's lecture theatres consisted of Dr Purdue and Mr E.J. Buckman, Mr P.W. Tullgren, Professor L.N. Short and Professor K.R. Dutton, Dr H. Maddox, Director, Higher Education Research and Services Unit and Mr D.D. Morris, University Planner, were co-opted to assist the Committee.

Copies of the full report are available from the Secretary to the University.

One of the University's stepped lecture theatres - R05
STAFF ASSOCIATION

At its meetings since the new Executive was formed issues discussed included University Government; Superannuation; indexing of subscriptions in the Wallet FAUSA practice; and local problems stemming from this; industrial registration; bond liabilities of staff who are ex-teachers; housing loan schemes; and the Higher Education Act 1975. A representative of the Commonwealth Bank Travel Service discussed with the Executive a new travel service now available through the local branch, but as no special or specific advantages could be negotiated for Association members the Executive simply draws the attention of members to the existence of the service. A Vestas is in transit to the campus and also a FAUSA Newsletter and these will be distributed in the near future along with Executive circulars.

APPROVAL FOR BACHELOR OF ECONOMICS DEGREE

The University Council, at its meeting on July 16, approved a proposal from the Faculty of Economics and Commerce to introduce a Bachelor of Economics degree in 1977. The Head of the Department of Economics (Professor C.A. Tisdell) is particularly pleased with the introduction of the degree and feels that it will encourage the development of the study of economics in the Newcastle area.

He commented that the Bachelor of Economics degree was a well-established degree within many other Australian Universities for specialists in economics and many such graduates had found it to be an advantage to be distinguished from those students undertaking studies in economics in either the Bachelor of Arts or Bachelor of Commerce degrees.

"In Australia, Universities, rather than professional bodies, have been the arbiters of what constitutes a sound training in economics. Employers rely on the universities to some extent for guidance in this matter as do students," he stated. The Bachelor of Economics degree differs from the Bachelor of Commerce degree in that the conditions governing the selection of subjects ensure that a candidate shall include at least a major in economics in his degree course. It will be possible for students who are uncertain where their true interests lie to select subjects in their first year of study which would permit them to transfer to the Bachelor of Commerce degree in their second year (or vice-versa). It had been planned to introduce new subjects in the degree in 1977, however, the lack of resources may curtail such new developments.

Full details of the degree requirements are displayed on the Faculty Notice Board in the Social Sciences building and will be contained in the Faculty Handbook when it becomes available.

It is noteworthy that such a development should be approved in the Bicentenary of Adam Smith's publication of The Wealth of Nations.

VISIT TO CAMPUS BY MR HURFORD, MP

Mr Chris Hurford, Shadow Treasurer of the Australian Parliament, will come to the University on August 3 as a guest of the Newcastle Committee of the Economic Society of Australia and New Zealand. Mr Hurford will speak in the Staff Conference Room, Faculty of Economics and Commerce, at 8 p.m. He will present the Australian Labor Party's views on National Economic Management.

Mr Hurford was formerly a Chartered Accountant in public practice in Adelaide. He is an honours graduate of the London School of Economics, a Fellow of the Institute of Chartered Accountants in Australia and of the Australian Society of Accountants and also an Associate of the Chartered Institute of Secretaries.

A member of the Australian Parliament since 1969, he has worked on a number of committees concerned with formulating and implementing the A.L.P.'s economic policies. One is the Federal Parliamentary Labor Party's Economic and Trade Committee, of which he is Chairman.

All members and friends are invited to an informal gathering in the Staff Conference Room prior to the commencement of the meeting. It is intended that next year's programme will be discussed and light refreshments will be served from 7 p.m.

CALL FOR HELP WITH VISITORS

Newcastle students and staff are invited to drive or provide a car for use by 10 Japanese students (six males and four females) who will visit the campus from August 2 to 6. The programme of the students' visit will include a reception in the Auchenmuty Room in the Union on August 2 at 7 p.m., a tour of the Hunter Valley on August 3, a tour of Newcastle and dinner at Edwards Hall on August 4 and a tour of the Pokolbin Vineyards on August 5. Members of the University will provide billets for the Japanese students. People who can assist by providing cars have been requested to ring Peter Law on Ext. 329.
THE COUNCIL

Noting that the Vice-Chancellor had been appointed Chairman of the Australian Atomic Energy Commission, the Chancellor drew attention to the suitability of Professor George's qualifications for the position and wished Professor George well on behalf of members of the Council.

Dr K.H. White has been appointed Acting Convenor of the Committee of Council that is reviewing University Government. Dr White will deputise for Mr W.G. Derkenne, who will be overseas until September.

The Vice-Chancellor reported that the Committee had received a number of final submissions in response to the White Paper which the Committee had issued. The Committee should now be able to move ahead and formalise its own views.

Council re-elected Sir Bede Callaghan Deputy Chancellor of the University for a year.

Mr C.B. Belcher, the Hon. K.G. Booth, Sir Bede Callaghan, Professor K.R. Dutton, Mr W.G. Derkenne, Mr A. O'Brien, Mr D.O.J. Purdue, Dr F.O.J. Purdue, Mr B.W. Relf, Mr W.G. Derkenne, the Vice-Chancellor, Mr E.J. Buckman, Mr L. Gibbs, Dr M.P.A. Kirton, Mr P.J. McDonald, Dr K.H. White, Mr L. Heath, Dr K.H. White, Mr W.G. Derkenne, the Vice-Chancellor, and Professor C.D. Ellyett were appointed to the Appeals Committee.

Mr E.J. Buckman, the Hon. K.G. Booth, Mr M.E. Edmonds, Mr C.M. Fisher, the Hon. R.W. Manyweathers, Mr C.M. Willoughby, Dr D.C. Finlay and Professor C.D. Ellyett were appointed to the Buildings and Grounds Committee.

Drs A.C. Doig and R.A. Doig were appointed to the Building and Grounds Committee.

Mr E.J. Doherty, the Hon. K.G. Booth, Mr W.G. Derkenne, Dr D.C. Finlay, Professor C.D. Ellyett, Mr P.W. Tullgren and Mr P.J. McDonald were appointed to the Academic Exclusion Appeals Committee.

Mr K.H. White, Mr C.B. Belcher, Mr F.J. Buckman, Dr M.P.A. Kirton and Mr P.W. Tullgren were appointed to the Academic Exclusion Appeals Committee.

Mr E.J. Doherty, the Hon. K.G. Booth, Mr W.G. Derkenne, Dr D.C. Finlay, Professor C.D. Ellyett, Mr P.W. Tullgren and Mr P.J. McDonald were appointed to the Academic Exclusion Appeals Committee.

Council had earlier asked the Vice-Chancellor to interview representatives of interested bodies to determine how far the university community could be kept as well informed as possible regarding the operation and government of the University and to decide on the future of the University's publication.

The Vice-Chancellor advised that he had met with the Presidents of the SRC, the PSA and the Staff Association to determine how far their members wished to be involved in the affairs of the Council.

Council discussed at length the proposal that business papers for its meetings be more widely distributed than at present and resolved to circulate the papers to the Presidents of the three organisations as a trial for a year on the understanding that they will treat them as confidential.

Council has decided that the term dates for 1977 will be:

First Term: Monday, March 7 to Saturday, May 14
Second Term: Monday, June 6 to Saturday, August 13
Third Term: Monday, September 5 to Saturday, November 5

Lectures and other classes will cease on Friday, October 28, 1977.

The end-of-year examination period will commence on Saturday, November 5 and cease on November 26, 1977.

Council approved the introduction of a prize in memory of the late Mr Norman Million, Senior Lecturer in French who died last February. The prize will be awarded annually to the student, if of sufficient merit, who achieves the best performance in French IV.

It was reported that more than $300 was collected for the endowment of the prize. Approval was given for the introduction of the Ercon (Australia) Prize in Geomechanics. It will be awarded on the recommendation of the Head of the Department of Civil Engineering to the graduating student with the best academic performance related to geomechanics if of sufficient merit. Ercon (Australia) offered to sponsor the prize.

The Buildings and Grounds Committee revealed that a number of submissions had been made to the Newcastle Area Office of the Public Transport Commission, with a view to obtaining improved bus transport to the University. The Committee has requested the Vice-Chancellor to write to the Minister on this matter.

Council was informed that a draft report of the Master Plan Review had been received from the consultants, Laurie & Heath Pty. Ltd. After further consideration by the Buildings and Grounds Committee, the consultants will be requested to consider the comments before finalising their report. When the report is received it is likely that the Committee will recommend that the document be circulated widely for comment, either in its entirety or in a summarised form.

The Buildings and Grounds Committee revealed that a number of submissions had been made to the Newcastle Area Office of the Public Transport Commission, with a view to obtaining improved bus transport to the University. The Committee has requested the Vice-Chancellor to write to the Minister on this matter.

CATALOGUE OF COMMONWEALTH UNIVERSITIES

The 20th Edition of List Of University Institutions in the Commonwealth is now available from the Association of Commonwealth Universities in London.

As well as full postal addresses, the List gives the personal names of the executive heads of universities and of the officer at each to whom general enquiries should be addressed.

It should be of practical use to those keeping international mailing lists, to admissions officers and others interested in new universities. For instance, the new edition records seven new Nigerian universities.

The address of the ACU is 36 Gordon Square, London, England, WC1H. A copy is held by Mr J.W. Armstrong, Secretary's Division
NOVELIST’S RESIDENCY ENDING

Christina Stead, the University of Newcastle’s second Writer-in-Residence, will leave on August 8 after a 10-week residence. During her stay on the campus she has talked to students, members of staff, graduates and local writers and has been primarily attached to the Department of English.

Soon after she arrived in Newcastle her latest book, Miss Herbert (The Suburban Wife), was published by Random House, New York and her most popular book, The Man Who Loved Children, was reissued by Holt, Rinehart and Winston.

Time Magazine, in a review of the two novels, stated that at 73 (she turned 74 this month) Christina Stead’s books of fiction have slowly earned her a reputation as one of the world’s most skilful writers. "The variety of settings in Stead’s work reflects the 45 years she has lived away from her native Sydney - in England, France and the U.S."

The National Times agreed that Christina Stead had written "dazzling works of fiction". "Her novels are great to read - long rich, funny, moving, utterly surprising in their rambles through a marvellously rendered and varied scene, the whole built solidly on ground chosen and controlled by a master."

The much-admired novelist, who left Sydney in 1928 and returned in 1969 after her husband died, lives in an annexe built on to her brother, Gilbert’s, home at Hurstville.

She finished her 14th novel, entitled, I’m Dying Laughing, in 1968 and is keeping it "on ice".

Christina Stead stated that she had enjoyed her role as Writer-in-Residence. "It is a beautiful campus. The people in Newcastle have been very friendly."

The University Library possesses copies of most of her works although it has been difficult to find them on the shelves since she came to the campus because of the interest in her visit and their use as texts for courses.

She recently presented three of her books to the Library.

WHAT DO YOU WANT TO BE WHEN YOU GROW UP?

A new measure of vocational and educational planning now in use is called a Self Directed Search. This is a questionnaire which is virtually self administered, self scored and self interpreted, and if done seriously, can throw up new areas of vocational choice for individuals to consider, or confirm that the areas of vocational they have chosen are congruent with their personality.

At the beginning of Third Term the Counselling Service, in association with the Careers and Student Employment Office, will be running a three-session course designed to allow people to use the Self Directed Search in a small group situation where their vocational choices can be worked out and discussed in confidence.

ASSOCIATION OF COMMONWEALTH UNIVERSITIES

The Association of Commonwealth Universities has announced the publication of a Register of Research Strengths of Universities in the developing countries of the Commonwealth. The main aim of the new Register is to provide, for the first time, brief information about the research areas in which universities in developing countries of the Commonwealth have said they can offer strong facilities to, and would welcome, academic staff and graduate students from other Commonwealth developing countries who wish to undertake advanced study or research.

But it will also give universities in other parts of the world - and government departments, foundations and international organisations - a factual statement of what the universities in the developing countries themselves believe they can offer in the way of strong research facilities.

The book has been prepared by the Association of Commonwealth Universities, in association with the Commonwealth Secretariat, to implement a recommendation of the Sixth Commonwealth Education Conference.

In its 150 pages are more than 1300 entries submitted by 68 universities in 18 countries or areas (Bangladesh, Botswana, Ghana, Hong Kong, India, Lesotho, Malawi, Malaysia, Nigeria, Papua New Guinea, Singapore, South Pacific, Sri Lanka, Swaziland, Tanzania, Uganda, West Indies, Zambia).

For easy reference these entries are arranged in nine main subject sections each divided into subsections. The entries contain brief details of the research areas, number of research workers engaged in them and relevant additional information, including notes of special equipment or important library collections. Each entry says whether an approach would be considered from postdoctoral and/or graduate students as well as from academic staff.

Four appendices include one listing Centres of Advanced Study in Indian Universities and another describing the Commonwealth Fund for Technica Co-operation and the Commonwealth Scholarship and Fellowship Plan.

The Department of Community Programmes will present A Trio of Hamlets at the University on August 15. Associate Professor Dennis Biggins, of the Department of English, will screen three film versions of the play, and lead discussion.
HUNTER REGIONAL
ART GALLERY
APPEAL

The Lord Mayor has launched an appeal for funds to assist with the completion of the new Art Gallery in Laman Street. The Deputy Vice-Chancellor (Professor L.N. Short), who is Chairman of the Appeal Committee on the Campus, has referred to the appropriateness of the University community being able to make a strong effort to provide a substantial contribution to the Appeal, especially in view of the generous support which the City gave to the University's Great Hall Appeal. The new Art Gallery is to provide a total area of 2020 square metres and will give an exhibition area four times larger than in the present building.

MOON ROCK
ON VIEW AT
UNIVERSITY

A rock sample brought back from the moon in 1972 by the Apollo XVI spacecraft was exhibited in the Great Hall on the Campus. The rock sample was brought back to Earth by the Apollo XVI spacecraft. The Apollo XVI moon exploration project was undertaken by the United States' N.A.S.A. in April, 1972. It was man's fifth successful landing on the surface of the moon. The module landed in the moon's highlands in an area known as the Cayley Plains.

The rock exhibited at the University was found 30 metres west/north west of the landing site. It is a polymict breccia and, like all lunar highland breccias, is very old. Scientific research is being conducted on the balance of the sample at N.A.S.A.'s Johnson Space Centre and at other research centres in the United States and certain foreign nations under a continuing programme of investigation. The rock sample was made available to the University by the United States Information Service.

In connection with the Art Gallery Appeal the University will hold an art exhibition in the Great Hall for three days from Friday, September 10. The exhibition will include pictures in the University Collection and items from the private collections of members of the University. Members of staff would greatly assist by lending pictures or items of sculpture or pottery for the exhibition. If you are able to do so then you should get in touch with Professor Short. All items will be covered by insurance and will be adequately protected during the period of the exhibition.

Many people from the Newcastle district have come to the University to see the moon rock.

GRANTS RECEIVED
FOR CHILDREN'S
THEATRE PROJECT

Errol Bray, a part-time tutor in the Drama Department, and Gary Fry, an M.A. Prelim. student with the Drama Department, have received grants to set up a children's theatre in Sydney, called the Pole Depot Children's Theatre in Penshurst. The grants and their sources: The Theatre Board $10,000, the Community Arts Board $10,000 and the Australian Assistance Plan $27,910.

JUDITH WRIGHT TO VISIT UNIVERSITY

Judith Wright, distinguished Australian poet and conservationist, will speak and read from her poetry at the University on Wednesday, August 4. The evening is being sponsored by the Decennial Convocations of the Australian National University and The University of Newcastle. The reading which is open to all interested members of the community, will be in the Anatomy Lecture Theatre, at 6 pm. Judith Wright has been described by literary critics as 'probably the best-known and widely-read Australian poet of our time'. As a public figure she is equally well-known for her work for the arts and conservation.

Judith Wright, who now makes her home at Braidwood, near Canberra, has lectured in Australian literature at various Australian universities and, in a varied writing career, she has written poetry, a biography, short stories and books for children.

The rock is believed to be 3,900 million years old. This is older than practically all rocks on the Earth's surface. It weighs 128 grams and is part of a rock that weighed 5,574 grams when transported back to Earth by the Apollo XVI spacecraft. The Apollo XVI moon exploration project was undertaken by the United States' N.A.S.A. in April, 1972. It was man's fifth successful landing on the surface of the moon.

The module landed in the moon's highlands in an area known as the Cayley Plains. The rock exhibited at the University was found 30 metres west/north west of the landing site. It is a polymict breccia and, like all lunar highland breccias, is very old. Scientific research is being conducted on the balance of the sample at N.A.S.A.'s Johnson Space Centre and at other research centres in the United States and certain foreign nations under a continuing programme of investigation. The rock sample was made available to the University by the United States Information Service.

In connection with the Art Gallery Appeal the University will hold an art exhibition in the Great Hall for three days from Friday, September 10. It is proposed to hold a Gala Opening on the evening of September 10.
APPLICABILITY OF UNIVERSITY DEGREE

"The University Degree: Training for Vocation or for Life?" will be the theme of a public seminar to be held on August 13 at the University of Wollongong. The seminar, which arose from an Academic Senate decision earlier this year, will mark University Day 1976.

SPRING NEWS

FIRST 21 YEARS OF RUGBY CLUB

University Rugby Club's anniversary dinner on July 17 provided many past players and officials with an opportunity to conjure up details of wins, losses and draws recorded by teams from the Club over 21 years. The celebration was deferred until the Club was able to complete an official history, based on written contributions from former players and supporters.

A copy of the book was presented to every one of the guests, checking some of the fanciful accounts of past games.

Special guests included the Minister for Sport, Recreation and Tourism, the Hon. Ken Booth, who was the Club's foundation Secretary, the former Vice-Chancellor, Professor James Auchmuty, who is still a Vice-President, and the President of Newcastle Rugby Union (Mr Jack Scott).

Professor Auchmuty told the 200-odd guests: "It is a great pleasure to see that you have come back long distances, some from other states, to attend." The Vice-Chancellor, Professor Don George, spoke about the reduction in Commonwealth support for universities, which were learning to live in "a steady state". Sport was affected too. It was a new challenge to find ways of making life at the University enriching without the same funds as before.

Mr Scott wished University Club well on behalf of the Newcastle, NSW Country, NSW and Australian Rugby Unions. Men from all walks of life were joined together in comradeship because they played Rugby.

Mr Booth, who played with University when he was in charge of student affairs at Newcastle University College, was a member of the original team, which played in Third Grade in 1955. He reflected on how he washed jumpers, when the colours were red and white ("the old blood and bandages"), so the Club could play the next day. He was very proud of how the Club had blossomed.

Other speakers were the First XV Captain, Dr Bernie Curran, the President of the Sports Union, Mr Brian O'Shea, and Mr Lance Cockburn. Professor George made a presentation to Mr O'Shea in recognition of his services to the Club as life member, prop, goal-kicker and captain.
**FORTHCOMING SPORTS FIXTURES:**

**Rugby League:** August 1, University plays Raymond Terrace, Raymond Terrace; August 8, University plays Hexham, University Oval; August 15, University plays Windale, Windale.

**Rugby Union:** July 31, University plays Wanderers, No. 2 Sports Ground; August 8, University plays Maitland, Lorn; August 14, University plays Boolaroo, University Oval.

**Soccer:** July 31, University plays Belmont, Belmont; August 8, University plays Stockton, University Oval; August 15, University plays Kurri Kurri, Kurri Kurri.

**Aussie Rules:**
- First Semi-Final, August 7;
- Second Semi-Final, August 14;
- Preliminary Final, August 21;
- Grand Final, August 28.

The inaugural meeting of the University One Day Cricket Club will be held in the Staff House Club (room adjacent to the bar) on Friday, July 30, at 1 p.m. Members of the staff and students, male and female, who are interested in playing cricket in which a match is played on a single Saturday afternoon in the coming season are invited to attend.

The purpose of the meeting is to adopt a constitution and elect officers so that the club may become affiliated to the University Sports Union.

**GALLANT LOSS IN BILLIARDS CHAMPIONSHIPS**

We hear that the Newcastle Zone final of the N.S.W. Billiards Championships resembled some swimming races at the Montreal Olympics. The result was the closest ever recorded in the history of the championships.

Mr M.E. Edmonds, Assistant Planner of the University, scored 403 points and his competitor, Mr B. Melmeth, 404 points. The match lasted two hours.

Mr Edmonds is a member of Shortland R.S.L.'s team and Mr Melmeth (Incidentally, a BSc graduate of the University) plays for Newcastle Masonic Club.

**SCHOLARSHIPS, FELLOWSHIPS**

The A.E. and F.A.Q. Stephens Post-Graduate Research Fellowship for 1977 invites applications for the A.E. and F.A.Q. Stephens Post-Graduate Research Fellowship from graduates of Australian universities other than the University of Sydney or from graduates of any overseas university, who produce satisfactory evidence of research experience, to undertake post-graduate work in the Faculty of their choice in the University of Sydney during 1977.

The Fellowship is valued at $3,250 and is awarded for one year only in the first instance, but may be removed.

Further information and application forms may be obtained from The Registrar, University of Sydney, 2006, with whom applications close on August 31, 1976.

**STAFF APPOINTMENTS**

**Mr Ross Gleghorn** has taken up duties as a Technical Officer in the Department of Psychology. He previously worked for the Sulphide Corporation at Boolaroo.

**Professor Howard K. Whitton** has joined the Secretary's Division as an Administrative Officer after a period of service with the Commonwealth Department of Education in Canberra.

**PROFESSOR ROSS WATTS**

Information and full details may be obtained from the Personnel Department, Extension 518 or 350.
Urgently needed - jobs

Have you any odd jobs around the house - painting, cleaning up, lawn mowing etc. - for students who need money to live on?

Ring Robin Loftus, Ext. 482.

Lost

Brooch - Gold Bar Tie-Pin type with Red Stone set in middle.

A lady lost this some months ago when visiting the campus. It is of considerable sentimental value to her. If you can help please telephone 573483.
