TO THE
VENERABLE THE ARCHDEACON
OF
NEW SOUTH WALES.

REVEREND SIR,

In presenting these first fruits of labour under your auspices, it would be unpardonable not to acknowledge the generous assistance granted at your recommendation by His Majesty's Government, which enabled me with less difficulty to accomplish the present work, than otherwise would have been sustained; and also, the aid afforded by the Society for Promoting Christian Knowledge towards carrying the work through the press.

To the mere Philosopher this grammar will afford abundant matter for speculation, in addition to which, the Christian will perceive another instance of the Providence of HIM who has said, "*I will draw all men to me.*" For this object alone the laborious task has been undertaken, and must be considered only as the prelude to the attempt of bringing the Aborigines of New South Wales to the knowledge of God our Saviour. For how shall they believe in him of whom they have not heard? And how shall they hear without a preacher in their own tongue the wonderful works of God?

That He who ruleth on high by His Spirit in the midst of the Churches may abundantly bless your ministerial labours amongst *an enlightened people*, and render this attempt instrumental for the Glory of God amongst "*A Foolish Nation*," is the fervent desire of,

Reverend Sir,

With unfeigned respect,

Your most obedient servant,

L. E. THRELKELD.

INTRODUCTORY REMARKS.

IN the year 1826 the writer printed a few copies entitled "Specimens of a dialect of the Aborigines of New South Wales," in which the English sounds of the vowels were adapted. Subsequently, it has been found, that many inconveniences arose in the Orthography which could only be overcome by adopting another system. Many plans were proposed and attempted, but none appeared so well adapted to meet the numerous difficulties, which arose, as the one in use for many years in the Islands of the South Seas wherein the elementary sound of the vowels do not accord with the English pronunciation. This however does not meet all the difficulties, because, there is a material difference in the Idiom of the language, namely : In the Tahitian, &c. &c., the vowels always retain their elementary sound, because, a consonant never ends a syllable or word : In the Australian language, a consonant often ends a syllable, or word, and therefore the coalition with the sound of the vowels affects the sound and consequently shortens it. Whilst in many instances the elementary sound of the vowel is retained *when closed by a consonant*, as well as, when the syllable or word is ended by the vowel, to meet this an accent is placed over the vowel, when the elementary sound is retained, without such accent the sound is shortened.

Illustration.

Bun, to sound as the English word Bun, a little cake.

Bún, to sound as the English word Boon, a gift,

Tin, to sound as the English word Tin, a metal.

Tín, to sound as the English syllable teen, in thirteen.

A set of characters cast expressly for the various sounds of the vowels would be the most complete in forming speech into a written language, but in the present instance it could not be accomplished. The present orthography is therefore adopted, not because it is considered perfect, but from the following considerations, viz. :—

1. It appears upon consideration, impossible so to express the sounds of any language to the eye, as to enable a stranger to pronounce it without oral instruction. The principal object therefore is to aim at simplicity; so far as may be consistent with clearness.

2. There appears to be a certain propriety in adopting universally, if possible, the same character to express the same sounds used in countries which are adjacent; as, Polynesia and Australia, even though the language be not akin. Especially when those characters have been adopted upon mature consideration, and confirmed by actual experience in the Georgian and Society Islands, the Sandwich Islands, the Feejee Islands, the Friendly Islands, New Zealand, and numerous other places in these Seas.

Having resided many years in the Island of Raiatea, and having been in the constant habit of conversing with and preaching to the natives in their own tongue, enable me to trace the similarity of languages used in the South Seas one with the other, proving they are but different dialects, whilst the natives themselves, and we also at the first interview could not understand the people of neighbouring Islands who spake radically the same tongue! The names of the Islands correspond with the change of dialect, for instance, Tahiti. The name of the Island in which sound the aspirate H abounds. Ru-ru-tu, about four hundred miles distance where the aspirate H is not used, the natives speaking more in the throat in consequence of the omission. At Ai-tu-tak-i, the language has the addition of the K, and at Ro-ro-tong-a, the language adopts the nasal ng, whilst at New Zealand, the nasal ng and k also abound. The Sandwich Islands drop many letters and insert instead the K and L, sounds unknown to the Tahitians. It is impossible to state which is the parent tongue. The table subjoined, page 7, displays at one view, their various alphabets. The following extract from a letter sent by Ka-rai-mo-ku from the Sandwich Islands to the Rev. W. Ellis, will shew the affinity betwixt the Sandwich Island tongue and the language of the Tahitians underlined.

Sandwich Island,	Eia kau wahi orero ia oe, ahea oe e
Tahitian,	Teia taau parau ia oe, ahea oe e,
English,	This is my communication to you, when will you
Sandwich Island,	hoi mai ia nei a noho mai ai io matou nei?
Tahitian,	hoi mai io nei e noho mai ai io matou nei?
English,	return hither and dwell with us?
Sandwich Island,	Ke ao nei no makou i ka orero a ki Akua;
Tahitian,	Te haapii nei matou i te parau a ti Atna;
English,	Learning are we the word of God;
Sandwich Island,	ke malama nei no makou i ka olelo ake Akua.
Tahitian,	te haapii nei matou i te parau a te Atua.
English,	regarding are we the word of God.

Owing to a peculiar custom at Tahiti when any word had a sound similar to that which was contained in the King's name, such word was changed, many words now obsolete are found in the Sandwich Islands: as, Orero the word in Tahiti for tongue, and used formerly as such, but now, by custom parau is used for speech, so also, ao is used to warn, to preach, &c., in Tahitian; but, since learning has been in vogue, haapii has been introduced for the verb to learn, and ao is in this sense obsolete. There is a much nearer affinity in the languages of the Islands in the Pacific Ocean than can be described within our limits, so many references to custom being necessary to explain the subject fully.

The following is a comparison of the Tahitian, Sandwich Island, and New Zealand languages, being the 19th of John, 30th verse.

Tahitian,	E ia inu aera Jesu i taua vinega ra,
Sandwich,	A i inu ana o Jesu i ka vinega,
New Zealand,	A no ka inu a Ihu i te wineka,
English,	And when drank Jesus the vinegar,
Tahitian,	Ua taupe ihora tana upo i raro,
Sandwich,	Ku rou ihora i ka poo,
New Zealand,	Ka pi ko iho tana matenga,
English,	Bowed his head down.
Tahitian,	duu adura i *tana varua.
Sandwich,	akuu aku la ka uhane.
New Zealand,	ka tuku ake i te wairua.
English,	(and) gave up the spirit.

In the Australian tongue there appears to exist a very great similarity of Idiom, as it respects the dual number and use of the form expressive of negation, and though it is observed by a

NOTE.—* Tana in the Tahitian means His, te would be the article the, in which case the affinity is much closer than the translation adopted allows, also in the Tahitian words duu a dura, it is very much disputed by natives and many of the Missionaries whether t should be used instead of d, this would bring the language with the New Zealand much closer in resemblance. It appears that the New Zealanders always insert k for the break of a double vowel in Tahitian, or else the nasal ng. for instance in the Tahitian Taata means man, in New Zealand it becomes Tangata. Tuu or duu in Tahitian means to give. In New Zealand it becomes Tuku, and Ingoa the word for name becomes Tahitian, by dropping the ng, thus Ioa the Tahitian for name. The Sandwich Islanders insert k for d or t, and often an l for the r: as, Tahitian Ua oti; Sandwich, Ua oki, it is finished. Tahitian, Orero: Sandwich, Olilo, the tongue, or speech. It appears that the Sandwichers omit the t also: as, Eia, this; which in Tahitian is Teia, whilst tau is transformed to kau, by them, for, mine.

writer in the article Greek language, *Rees Cyclopædia*, that, "*The dual number is by no means necessary in language, though it may enable the Greek to express the number two or pairs with more emphasis and precision.*" Yet this assertion is not at all borne out by facts, because in this part of the hemisphere, all the languages in the South Seas in common with New South Wales, possess a dual number, and so essential is it to the languages, that conversation could not be carried on without this form of speech. There is a peculiarity in the dual of the Australian tongue which does not exist in the Islands, namely, a conjoined case in the dual pronouns in which the nominative and accusative are blended as shewn in the pronouns, whilst the verb sustains no change, excepting when reflective, or, reciprocal, or continuative. Whilst in the Islands there are dual verbs. The mode of interrogation and replication are very much alike in Idiom in both languages, and so peculiar as hardly possible to be illustrated in the English language, scarcely ever giving a direct answer, but in such a manner as leaves much to be implied. The Aborigines of this colony are far more definite in the use of tenses than the Islanders, who have nothing peculiar in the use of the tenses. The subject of tenses caused much perplexity and diligent examination, nor, did the observations of eminent writers on the Theory of language tend to elucidate the matter. Because the facts existing in the language of the Aborigines of New Holland are in direct contradiction to the note (R), article *Grammar Encyclopædia Britannica* in which certain tenses are represented "as peculiar to the Greek, and have nothing *corresponding to them in other tongues*, we need not scruple to *overlook them as superfluous.*" Now the Aborigines use the verb, and also the participle, in a tense denoting time past in general; and, time past in particular; as, this morning only; and, time past remote: as, in some former period: as, when I was in England, or was a boy, &c. The future time of the verb, and, participle is also specified in a similar manner, specifically either now or to-morrow morning, or generally, as in futurity; besides which there is another curious fact opposed to the conclusion of the writer's note, which reads thus: "Of the Paulo post fusturum of the Greeks, we have taken no notice, because it is found only in the passive voice; to which if it were necessary, it is obvious that it would be necessary in all voices, *as a man may be about to act, as well as to suffer immediately.*" Now such is the very idiom of this language, as will be seen in the conjugation of the participle, for

the pronoun being used either objectively or nominatively, will place the phrase either in the one sense or the other, such change in the pronoun constituting the equivalent to the passive voice or the active voice. The most particular attention is necessary in the tenses of the participle as well as that of the verb, each tense being confined to its own particular period, as shewn in the conjugation of the verbs. The various dialects of the blacks may yet prove, as is already ascertained in the Islands, to be a more apparent difficulty than real; but when one dialect becomes known, it will assist materially in obtaining a speedier knowledge of any other that may be attempted, than had no such assistance been rendered.

Although tribes within one hundred miles do not at the first interview understand each other, yet I have observed that after a very short space of time, they are able to converse freely, which could not be the case were the language, as many suppose it to be, radically distinct. The number of different names for one substantive may occasion this idea. Water for instance has at least five names, and fire has more, the moon has four names according to her phases, and the Kangaroo has distinct names to each sex, according to size, or the different places of haunt, so that two persons would seldom obtain the same name for a Kangaroo if met wild in the woods, unless every circumstantial was precisely alike to both inquirers. The quality of a thing is another source, from which a name is given as well as its habit, or manner of operation. Thus one man would call a musket, a thing that strikes fire, another would describe it as a thing that strikes, because it hits an object; whilst a third would name it a thing that makes a loud noise, and a fourth would designate it a piercer, if the bayonet was fixed. Hence arises the difficulty to persons unacquainted with the language, in obtaining the proper names of that which is desired, for instance, a visitor one day requested the name of a native cat from M'Gill, the Aborigine, who replied Minnaring. The person was about to write down the word Minnaring, a native cat, when I prevented the naturalist, observing that the word was not the name of the native cat, but, a question, namely, What is it? you say being understood. The Black not understanding what was asked. Thus arise many of the mistakes in Vocabularies published by transient visitors of foreign parts.

In a "description of the natives of King George's sound, (Swan river colony,) written by Mr. Scott Nind, and communicated by R. Brown, Esq., F. R. S., read before the Royal Geo-

graphical Society, &c., 14th February, 1831," there is an interesting account of the natives, and also a vocabulary, not one word of which appears to be used or understood by the natives in this district, and yet from a passage at page 24, the following circumstance leads to the supposition, that the language is formed on the same principles, and perhaps radically the same tongue, the writer observes: "It once occurred to me to be out shooting, accompanied by Mawcurrie, the native spoken of, and five or six of his tribe, when we heard the cry Coo-whie, Coo-whie-cá-cá, upon which my companion stopped short, and said that strange blackmen were coming." Now in this part of the colony under the same circumstances, a party of blacks would halloo, Ka-ai, Ka-ai, kai, kai. Which allowing for the difference in orthography, would convey nearly, if not precisely the same sound, the meaning is halloo, halloo, approach, approach. Also at page 20, the same word used by the natives here in hunting and dancing is mentioned, as spoken by those Aborigines in the same sort of sports: viz., Wow, which in this work is spelt Wau. It means move. Also at page 28, the phrase absent, at a distance is rendered Bó-cun, and Let us go away, by Bó-cun oola, or Wat-oola, here the natives would say, Wai-ta wol-la: see the locomotive verb in the conjugation of which a similarity of use will be perceived. At Wellington Valley the names of things are the same in many instances with those of this part, although three hundred miles distant, and in a small vocabulary with which I was favored, the very barbarisms are marked as such. Whilst mistaken names are written, the natural result of partial knowledge; for instance, Ki-wung, is put down, the Moon, whereas it means the New Moon, Yel-len-na, being the moon. In the higher districts of Hunter's River, my son was lately conversing with a tribe, but only one could reply, and he it appears had a few years back been to this part, and thus acquired the dialect. Time and intercourse will hereafter ascertain the facts of the case.

The arrangement of the grammar now adopted, is formed on the natural principles of the language, and not constrained to accord with any known grammar of the dead or living languages. The peculiarities of its structure being such, as totally to prevent the adoption of any one as a model. There is much of the Hebrew form in the conjugation. The dual of the Greek and the deponent of the Latin. However these terms are not introduced, excepting the dual, the various modifications of the verb and participle exemplifying the sense in which they are used.

The peculiarity of the reciprocal dual may be illustrated by reference to a custom of the Aborigines, namely: When a company meet to dance, each lady and gentleman sits down opposite to one another, and reciprocally paints each others cheek with a red pigment, or if not a sufficiency of females, the males perform the reciprocal operation. Also in duelling, a practice they have in common with other barbarous nations, the challenge is expressed in the reciprocal form. The terms adopted to characterise the various modifications, may not ultimately prove the best adapted to convey the various ideas contained in the respective forms, but at present it is presumed they are sufficiently explicit. Many are the difficulties which have been encountered, arising principally, from the want of association with the blacks, whose wandering habits, in search of game, prevent the advantages enjoyed in the Islands of being surrounded by the natives in daily conversation. It would be the highest presumption to offer the present work as perfect, but so far as opportunity and pains could conduce to render it complete, exertion has not been spared. It is necessary to notice certain Barbarisms which have crept into use, introduced by sailors, stockmen, and others who have paid no attention to the Aboriginal tongue, in the use of which both blacks and whites labour under the mistaken idea, that each one is conversing in the others language. The following list contains the most common in use in these parts:—

PART I.

PRONUNCIATION AND ORTHOGRAPHY.

CHAPTER I.

PRONUNCIATION.

PRONUNCIATION is the right expression of the sounds of the words of a language.

Words are composed of Syllables, and Syllables of Letters. The Letters of the Language of the Aborigines of New South Wales, are as follow :—

A B D E I K L M N Ng O P R T U W Y.

Note : It is very doubtful if *D* belongs to the alphabet—the Natives generally use the *T*.

OF VOWELS.

As the English Vowels differ in sound from those already adopted in the numerous South Sea Islands, it is necessary to shew the pronunciation of the latter ;

A E I O U.

A is pronounced as the English pronounce *a* in the words *are*, *far*, *tart* ; as, *ba*, the verb to be, accidental.

E is pronounced as slender *a* in *fate*, or *e* in *where*.

I pronounced as the short *i* in *thin*, *tin*.

O is pronounced as in English, *No*.

U is pronounced as *oo* in the words *cool*, *cuckoo*.

When two vowels meet together they must be pronounced distinctly, as *niu-wo-a*, the pronoun he, *bo-un-to-a* she, &c. so also when double vowels are used in the word ; as, *Wi-yé-en*, have spoken.

OF DIPHTHONGS.

A Diphthong is the coalition of two vowels to form one sound. They are as follow :

1. ai, as *ko-lai*, wood ; *wai-ta-won*, the large mullet.

2. au, as *nau-wai*, a canoe; *tau-wil*, that may eat.

3. iu, as *niu-wo-a*, the pronoun he; *pai-piu-wil*, that it may appear. Observe, that the diæresis, whenever used, disunites the diphthong, as *ka-ü-ma*, to gather together.

Note : *ai* Rhymes with *Eye*.
au Rhymes with *Cow*.
iu Rhymes with *Pew*.

OF CONSONANTS.

B is pronounced as in the English words *be*, *crab*.

D as heard in *deed*, if used at all by the natives.

K as heard in *Kirk*, *King*.

L as heard in *Lord*, *Ell*.

M as heard in *Man*, *Embark*.

N as heard in *Nun*, *No*.

Ng is peculiar to the language, and sounds as in *ring*, *bung*, whether at the beginning, middle, or end of a word.

P as heard in *Pea*, *pip*, *pipe*.

R as heard in *rogue*, *rough*, *Rome*, whenever used it cannot be pronounced too roughly; when double, each letter must be heard distinctly.

T as heard in *tea*.

W as heard in *war*.

Y as heard in *yard*.

Europeans often confound *D* with *T* owing to a middle sound which the natives often use in speaking quickly; so also the *T* with *J* arising from the same cause as *Won-ti-won-ti* the name of a place is often called by the English *Won-je-won-je*.

OF ACCENTS.

The language requires but one marked accent, which serves for the prolongation of the syllable; as, *bón*, him; *bún*, the root of to smite. The primitive sound is thus retained of the vowel which otherwise would be affected by the closing consonant, as *bun*, the root of the verb to be accidental, rhymes with *fun*, but *bún*, to smite, rhymes with *boon*, a gift, &c.

Note : It is necessary to remark that the marked accent is placed over the letter upon which the accent falls throughout this work.

CHAPTER II.

ORTHOGRAPHY.

In syllabication, every consonant may be taken separately, and be joined to each vowel, in order to make syllables. Thus the list of nouns, in the third part of this work, may be easily read, observing that a consonant between two vowels must go to the latter; and two consonants coming together must be divided. The only exception is *Ng*, which is adopted for want of another character to express the peculiar nasal sound, as heard in *hanger*, and consequently, is never divided. The following are general rules.

1. A single consonant between two vowels must be joined to the latter syllable: as, *Ko-re*, Man; *Yu-ring*, Away; *Wai-ta*, depart.
2. Two consonants coming together must always be divided, excepting the compound character, *Ng*: as, *Tet-ti*, to be dead, Death. *Bung-ngai*, New.
3. Two, or more vowels, divide excepting the diphthongs: as, *Nga-to-a*, It is I. *Yu-ai-pa*, thrust out. The diæresis marks when the diphthong is divided: as, *Kau-wa*, may it be. (a wish), *Ka-ü-ma*, to collect together; to assemble.
4. A vowel ending a syllable or word must have its elementary sound: as, *Bün-kil-lí*, the action of smiting; *Ta* the root of the verb, to eat.

ACCENTUATION.

In general dissyllables and trisyllables accent the first syllable; as, *Pun-ti-mai*, a messenger; *Pir-ri-wul*, a chief, king, &c.

Compound derivative words, being descriptive nouns, have the accent universally on the last syllable; as, *Wi-yel-lí-kán*, one who speaks, from *Wi-yel-lí* the action of speaking, so also from the same root *Wi-yel-lí-ngé-il*, the place of speaking, as a pulpit, the stage, a reading desk, &c.

Verbs in the present and past tenses have their accent on the particles denoting such tense: as, *Ta-tán*, eats. *Wi-yán*, speaks. *Wi-yá*, hath told. This must be particularly attended to, or, mere affirmation would become imperative, and vice versâ: example, *Kau-wa*, be it so; a wish. *Kau-wá*, so it is; an affirmation.

In the future tenses the accent is always on the last syllable but one, whether the word consists of two or more syllables: as, *Ta-nun*, shall or will eat; *Wi-yen-nun*, shall or will

speak. *Bün-kil-lí-nun*, shall or will be in the action of smiting. *Bün-nun*, shall or will smite. Present participles have the accent on the last syllable; as, *Bün-kil-lín*, now in the action of smiting; *Wi-yel-lín*, now in the action of talking, speaking, &c. Past participles have their accent on the last syllable but one; as, *Bün-kil-lí-á-la*, was smiting, or smote and continued to smite—equivalent to fought. But the participial particle denoting the state or condition of a person or thing, has the accent on the antepenultimate: as, *Bün-tó-a-ra*, that which is struck, smitten, beat, &c. Thus, two accents are apparent. One the Radical accent. The other the shifting one which belongs to the particles.

EMPHASIS.

The Aborigines always lay particular stress upon the particles in all their various combinations, whether to Substantives denoting cases, or to Verbs denoting the moods or tenses. But when attention is particularly commanded, the Emphasis is thrown on the last syllable, often changing the termination into *ou*: as, *Wol-la-wal-la*, the imperative, move, for, be quick. To urgently command would be *Wol-lo-wol-lou*, dwelling double the time on the *ou*. But to emphatically charge a person with any thing the Emphasis is placed on the particle of Agency: as, *Ngá-tó-a*; It is I; *Ngín-tó-a*; It is thou.

CHAPTER III.

ETYMOLOGY.

PARTICLES.

It is by the use of particles, the whole progress of the mind is manifested, and only in the right use of them may we expect to render ourselves correctly intelligible to the Aborigines. The following are used in the declension of nouns and pronouns, according to their terminations and cases.

1. The simple nominative case, which merely declares the person or thing, or the quality: as, *Nga-to-a*, I the person; *Ko-re*, Man; *Ko-lai*, wood; *Ke-kul*, sweet; *Murrorong*, good. There are no particles used in this case excepting to formative nouns: as, *Bün-ki-yei*, a smiter, from the root *Bün*, to smite; *Ke-kul-ke*, sweetness; or, to transform the formative noun into a verb, merely declaring the abstract action: as, *Bün-kil-lí*, the action of smiting.

2. The agent nominative case, which has the power of operating, and is always known by the termination in the particle *O*; but this particle of agency is preceded by consonants or accented according to the last syllable of the noun. The personal and instrumental Interrogatives are unchangeable, namely: *To?* Who? *Ko?* What thing? The particles of agency governed by the preceding noun are *To*, *Ko*, *Lo*, *O*, *Ro*; perhaps, merely to coalesce readily in pronunciation.

3. The genitive case, which shews the relation of one thing considered as belonging in some manner to another. The interrogative pronoun and names of persons require *im-ba*: as, *Ngan-im-ba?* whose? *Threlkeld-im-ba*, Threlkeld's. *Pir-i-wul-im-ba*, the King's; but, things and persons require *ko-ba*: as, *Min-na-ring-ko-ba?* belonging to what thing? *Ko-re-ko-ba*, belonging to man. The dual, plural, and the singular feminine pronouns; form the genitive by affixing *ba* to the accusative: as, *Nga-lin-ba*, belonging to us two; *Nge-a-run-ba*, belonging to us, or ours; *Bo-un-no-un-ba*, belonging to her, or hers. But the other singular pronouns are themselves changed besides the use of the particle: as, *Em-mo-un-ba*, mine, belonging to me; *Ngi-ro-un-ba*, thine, belonging to thee. But time and place require *Kul*, *Kal*, and *Ka-le-en*: as, *Bung-ngai-kul*, belonging to the present period of time now becoming; *England-kal*, a man belonging to England, an Englishman; *England-kal-le-en*, a woman belonging to England, an Englishwoman; *Un-ti-kal*, hereof, belonging to this place.

4. Dative case, which shews the ultimate object to which an action tends: as, to a person for him to possess or use in any way expressed by *—ning* to the interrogative pronoun and names of persons only, but *—ko* to all other nouns, and to the abstract action forming it into the infinitive in regimine or supine: as, *Bun-kil-li-ko*, for to smite. But motion towards a person or thing opposed to from where the person or thing is, requires the following particles according to the various terminations of the nouns: viz. *—ta-ko*, *—ka-ko*, *—la-ko*, *—a-ko*, *—ra-ko*, the personal pronoun require *—kin-ko* and place, *—ka-ko*, see Table of Declensions.

5. Accusative case which denotes direct action, on the person not merely towards the person, the object or patient of a transitive verb. The personal pronouns are distinct particles, see their declension. But names of persons have the terminating particle *—nung*, so also the interrogatives of person, place, and

thing as, *Ngan-nung?* Whom? or who is the patient? *Won-nung?* Where? or where-at? *Min-nung?* What? or what object? *Threlkeld-nung*. Threlkeld is the objective or accusative case. All other common substantives not derivatives, are placed before the active verb without any change from the simple nominative, nor can any error arise, because when used as the agent the sign of that case would be attached: as, *Ka-rai Bu-wa*, smite the kangaroo. *Ka-rai-to tia bun-kul-la*, the kangaroo struck me; or the equivalent, I was struck by the kangaroo.

6. Vocative case, the particle *A-la* or *El-la*, calling for attention to the person in the nominative, not agent nominative case, is prefixed: as, *A-la Pirriwol!* O king! Equivalent to may it please your majesty.

7. Ablative case, this and the dative are alike excepting in the ablative particles annexed to the pronouns, &c. which mark this case they are as follow: viz., 1. *Kai* meaning from, concerning, about, on account of, used only to proper names and pronouns, but to persons and things, according to their terminations, *—tin*, *—lin*, *—in*, *—rin*, meaning from, on account of, &c. 2. *Kin-birung*, meaning from, opposed to the dative towards a person used only to pronouns; proper names require *ka-bi-rung* whether of persons or places; but persons or things require according to their terminations, *—ta-bi-rung*, *—ka-bi-rung*, *—la-bi-rung*, *—a-bi-rung*, *—ra-bi-rung*, to mark the opposite case to the dative. 3. *Ka-to-a*, meaning to be with, as an agent or being, affixed to personal pronouns, and proper names of persons only; but persons, things and places, annex according to their respective terminations *—to-a*, *—ko-a*, *—lo-a*, *—o-a*, *—ro-a*, meaning by, through, with, near; no causative effects are understood by any of these particles. 4. *Ka-ba*, meaning to be, at or on, used to place and *Kin-ba*, to be present with a person at his place.

Note.—The meanings opposite to all the particles are their essences, so that they cannot be used indifferently, as, is the case very often in the English language, for prepositions, or adverbs, or even in an opposite sense ; as, *Ya-ko-ai* How ? will not do to ask the question, How many ? because modality is the attribute ; but, How many ? must be *Min-nán* ? What present ? because presentiality is the attribute, and the answer would be much is present, or little ; few, or many ; or one up to three, beyond which they have no further numbers.

PART II.

THE PARTS OF SPEECH.

OF THE SUBSTITUTE FOR THE ARTICLE.

To express indefinitely any noun, the mere substantive is used ; as, *ma-ko-ro*, a fish or fishes ; *tib-bin*, a bird or birds, in a general sense ; *ko-lai*, wood, or a stick : to make these plural the plural pronoun would be attached ; as, *un-ni ta-ró ma-ko-ro*, this, these fish, denoting they are here present. To express the fish as an active agent would be *benga-li ma-ko-ro*. This fish, meaning did some action, and so of all nouns, as will be explained under the head pronouns.

OF SUBSTANTIVES.

Nouns are the Names of Persons, Things, Actions, and Place. They are proper when used as a Name to any Individual, intellectual Person, and common or collective when denoting the Name of Things or Beings, as, *Ko-re*, Man, or Mankind ; *Ka-rai*, Kangaroo ; *Ma-ko-ro*, Fish. The pronoun demonstrates the number whether singular or plural. Nouns descriptive of Person, Character, and Office are derived from the roots of the corresponding verbs denoting such description. as, *Wi*—, the root of the verb, to speak ; *Wi-yel-li-kán*, one who speaks, a speaker ; *Wi-yai-yé*, one who always talks, a talker, chatterer. When names of things are appropriated to a Person, as the Person's Name, that Name must be declined in the first Declension of Nouns to shew it is the Name of a Person and not of the Thing : as, *Tin-ting*, a crab, belongs to

the third Declension, and the genitive would be expressed thus : *Tin-ting-ko-ba*, belonging to a crab ; but when used as the Name of a Person it would be in the genitive *Tin-ting-um-ba*, belonging to Crab, either Mr. or Mrs. according as understood by the pronoun. There are a few distinctions of gender in certain nouns, but not generally : as, *Po-ri-bai*, a husband ; *Po-ri-kun-bai*, a wife ; *Yi-nál*, a son ; *Yi-nál-kun*, a daughter, but, *Pir-ri-wul*, means a chief, king or queen, according to the gender of the pronoun attached. To animals, in most instances, there are proper names special to the male, and to the female : as, *Wa-ri-kul*, a he dog ; *Tin-ku*, a she dog. Names of places are generally descriptive, hence derived from whatever expresses the subject : as, *Pun-téi*, the narrow place ; *Búl-wa-ra*, the high place ; *Ti-ra-bé-en-ba*, the toothed place ; *Bín-ki-li-ngéil*, the place for fighting, the field of battle. Names of country have a declension peculiar to place, and in the genitive have a feminine and masculine termination, as *England-kal*, means *English*, man understood, the termination being masculine ; *England-ka-lé-en*, means *English*, woman understood, the termination being feminine : so also, *Un-ti-kal*, of this place, masculine ; *Un-ti-ka-lé-en*, of this place, feminine. A noun becomes an adjective verb or adverb, according to the particle used, or the juxtaposition of the word : as, *Pi-tul*, joy ; *Pi-tul-mul-li*, to cause joy ; *Pi-tul-li-kán*, a joyful being ; *Pi-tul-ka-tán*, to exist joyfully ; *Mur-ro-róng*, good ; *Murroróng-tai*, the good---some person understood ; *Murroróng u-má*, good done, well done, properly done.

OF THE DECLENSION OF NOUNS, CASES, ETC.

There are Seven Declensions of Nouns, according to which all Adjectives and Participles, as well as Nouns are declined.

Nouns are declined according to their use and termination. When used for the name of an individual person, they are declined in the 1st Declension, whatever may be the termination of the word ; but when used as the name of a place they are declined in the 7th Declension. Common nouns are declined in the 2nd, 3rd, 4th, 5th, and 6th Declension according to their respective terminations.

Nouns have seven cases ; viz. two nominative cases, genitive, dative, accusative, vocative, and ablative. The first nominative is simply declarative wherein the subject is inactive : as, this is a bird, *umí ta tib-bin*. The second nominative is when the subject is an agent causative of action : as, *tib-bin-to ta-tán*, the bird eats ; in which case the particles ending in *o* are

affixed to denote the agent according to the terminations of the respective nouns ; hence the following general Rules.

1. Nouns or participles ending in *i*, or *n* require the particle of agency *-to* to be annexed when spoken of as an agent : as, *Ki-ko-i*, a native cat ; *Ki-ko-i-to*, the cat did, does, or will do according to the tense of the verb subjoined.
Tib-bin, a bird ; *Tib-bin-to*, the bird did, does, or will do, &c.
Ngur-rul-li, the active participle or infinitive according to the particle affixed, to hear, believe, obey, &c. *Ngur-rul-li-to*, faith, or belief, did, does, or will do, &c.
2. Nouns ending in *ng*, *a*, *e**, *o*, *u*, require the particle of agency *ko* annexed when spoken of as an agent : as,
Nu-kung, a woman ; *Nu-kung-ko*, the woman did, does, or will do, &c.
Mai-yá, a snake ; *Mai-ya-ko*, the snake did, does, or will do, &c.
Ko-re, a man ; *Ko-re-ko*, the man, did, does, or will do, &c.
Wo-i-yo, grass ; *Wo-i-yo-ko*, the grass did, does, or will do, &c.
Tin-ku, a bitch ; *Tin-ku-ko*, the bitch did, does, or will do, &c.
3. Nouns ending in *l* require the particle of agency *lo* to be annexed when spoken of as an agent : as,
Pun-nul, the sun ; *Pun-nul-lo*, the sun did, does, or will do, &c.
Yi-nál, a son ; *Yi-nál-lo*, the son did, does, or will do, &c.
4. Nouns of three syllables ending in *ro* require the accent shifted to the *ó* when spoken of as an agent : as,
Ma-ko-ro, fish ; *Ma-ko-ró*, the fish did, does, or will do, &c.
5. Nouns of three syllables ending in *re* change the *e* into *ó* when spoken of as an agent : as,
Ko-ke-re, a hut, house ; *Ko-ke-ró*, the house did, does, or will do, &c.
6. Nouns of four syllables ending in *r* require the particle of agency *ró* to be annexed when spoken of as an agent : as,
Kul-mo-ti-ur, a woman's name ; *Kul-mo-ti-ur-ró*, K did, does, or will do, &c.

Note---The participle form of the verb in the passive voice when used as an agent, changes the last syllable into *ró* : as,

Bín-to-a-ra, that which is struck.

Bín-to-a-ró, that which is struck did, does, or will do, &c.

Yel-la-wai-to-a-ra, that which sits, squats.

Yel-la-wai-to-a-ró, that which sits, did, does, or will do, &c.

* Exception, when *r* preceeds *o* ; as, *Ma-ko-ro*, it belongs to the 5th Declension.

7. Names of Places have three Genitives, as will be shewn separately.

This Declension is proper only to the Interrogative Personal Pronoun *Ngan* ? who ? and to words of any description when used as the Names of Persons, independent of their respective signification, which may denote objects, actions, qualities, &c. : as, *Bi-ra-bán* means the bird called an Eagle-hawk, in which sense it must be declined in the 2nd Declension. Note.—The Interrogative Pronoun signifying place is Won-ta?
 Where is it? and which may be substituted for Mulubinba,
 when the model would then become Interrogative: as, Won-
 ta-kal? Belonging to what place? Won-ta-ka-ba? Where
 is it at? At what place is it? &c.

OF ADJECTIVES AND PARTICIPLES.

Adjectives have no particular ending, it depending entirely
 on their situation, or on particles, whether they are nouns, adjec-
 tives, verbs, or adverbs; as, Mur-ro-róng, Good; Ya-ra-kai,
 Bad; Ko-néin, Pretty. Decline these according to their termi-
 nations with the particles of agency affixed, they would then
 become agents, and consequently nouns: as, Mur-ro-róng-ko,
 The good; Ya-ra-kai-to, The bad or evil; Ko-né-in-to, The
 pretty, or the beauty respectively, did, does, or will do, &c.;
 but participles in the passive voice terminate always in the
 compound particle tó-a-ra; the root of the verb being prefixed
 either with or without the causative particles according to the
 sense required: as, Ki-yu, is the root of to roast with fire, to
 scorch, to broil.

Ki-yu-ba-tó-a-ra, That which is roasted;

Ki-yu-ba-tó-a-ra bang, I am roasted;

Ki-yu-ba-tó-a-ro, That which is roasted, is the agent, &c.

Adjectives denoting abundance are often formed by a redup-
 lication: as, Mur-ro-róng, good; Mur-ro-róng-mur-ro-róng,
 excellent, abundance of good; Kau-wul, great, large, big;
 Kau-wul-kau-wul, many, abundance.

Adjectives denoting want, are expressed by the negative
 super added: as, Mur-ro-róng ko-ri-en, not good, worthless.

Adjectives denoting similitude of resemblance require the
 particle Ki-lo-a, like, affixed to the subject: as, Won-nai-ki-lo-a,
 like a child, child-like: but if denoting habit the particle kei
 is affixed: as, Won-nai-kei, childish.

Adjectives denoting character, manner, or habit, are formed
 from the roots of verbs expressive of such; having the par-
 ticles ye or kei affixed, according to the verb subjoined: as,
 Bún, the root of the verb to smite; Bún-ki-ye, a smiter; but
 Bún-kil-li-kán, would be one who smites; Won-kul, to be
 foolish; Won-kul-kei, foolish; Ngu-ra-kei, wise, skilful;
 Buk-ka-kei, savage, ferocious, wrathful; Ke-kul-kei, sweet,
 nice, pleasant.

OF COMPARATIVES AND SUPERLATIVES.

The following are the methods used in comparison, there
 being no particles to express the words better, best, &c.; the
 word But-ti, is equivalent to the adverb more, but will not
 express most, as the superlative, the sense being, continuing
 whatever is about longer.

The comparative of equality is formed thus:—

1. { Ke-kul kei un-ni yan-ti un-noa ki-lo-a, } This is as sweet
 { Sweet be this as that like. } as that.

The comparative of inferiority is formed by putting the
 negative particle ko-ri-en after the adjective, thus:—

2. { Ke-kul ko-ri-en un-ni yan-ti un-noa ki-lo-a, } This is not
 { Sweet not this as that like. } so sweet as
 that.

The comparative of superiority is formed by the use of the
 word Kau-wul-kau-wul, a reduplication of great, and the
 particle of negation to that which is inferior: as,

3. { Ke-kul kei unnikau-wul-kau-wul ke-a-wai un-noa. } is
 { Sweet be this great great be not that. } This most
 sweet.

OF NUMBERS.

Numbers are only cardinal; they are declined as nouns, so
 far as their numbers extend: namely, Wa-kól, one; Bu-lo-a-ra,
 two; Ngo-ro, three; Wa-rán, four; beyond which there are
 no further numbers, but the general term Kau-wul-kau-wul,
 much or many. The interrogative of quantity, or number, is

Min-nán? which present? for how many? the answer would be in any of the above numbers, or thus: *Kau-wul-kau-wul ko-re*, many men: or, *Wa-re-a-ko-re*, few men. To express what are denominated ordinal numbers, so far as the above numbers extend, can only be done in the declension of the noun to which they may be attached, the adjective being also subject to declension, according to their own termination, independent of the termination of the noun: as,

Pur-re-ung ka ngo-ro ka, On the third day.

Ko-lai-to-a ngo-ro-ko-a, By the third tree, beside, not instrumental.

Bu-ló-a-ra, is used in the Dual, and of the sixth Declension.

There are also two other expressions which may be noticed under this article, namely: *Win-ta*, equivalent to a part of, a portion, some of; also, *Yan-tín* equivalent to the whole, or all: as,

Un-ti bo win-ta ko-re, } Some of the men are here.
Here be part of the men, }

Un-ti bo yan-tín ko-re, } All the men are here.
Here be all the men, }

OF PRONOUNS.

The primitive or personal Pronouns in the first, second, and third Person Singular are, distinct from the Pronouns for such Persons when used to the Verb, and as such are used by themselves, in answer to an Interrogative, or emphatically with the Verb. These always precede the Verb when they are used as Nominatives to the Verbs, and always call the attention to the Person and not to the Verb: these will therefore be designated Personal Nominative Pronouns, and marked as such: thus, P N, for Personal Nominative; but the Personal Pronouns used as the Nominative to Verbs and never by themselves, nor in answer to Interrogatives will be marked V N, to denote Verbal Nominative; the Verb being the prominent feature to which the attention is called, and not to the person, these always follow the Verb. The strictest attention is absolutely necessary to the Pronouns in all their persons, numbers, and cases, by them the singular, dual, and plural numbers are known; by them the active, the passive, the reciprocal, and reflective state of the Verbs are known, which will be exemplified in the Conjugation of Verbs, as well as in the Declension of the Pronouns. The plural Personal Pronouns are used indiscriminately, there being only one Nominative Pronoun to

each Person, so also the singular Feminine Pronoun which is only of one description. The dual number also has but one Pronoun in the Nominative case; but the dual number has a case peculiar to this language; namely, a Nominative and Accusative case conjoined in one word: as, though, the English Pronouns I and Thee, Thou and Him, &c., could be used I-thee, thou-him, &c. but the Pronouns are distinct from those used for such persons in their other respective numbers. This is denominated the conjoined dual case, and marked N A, to denote the Nominative and Accusative conjoined.

THIRD PERSON NEUTER, PRESENT.

The neuter pronouns are inexpressible in English without circumlocution in consequence of the locality of the person or thing being included in the word used as a pronoun, they are so compound in their signification as to include the demonstrative and relative, as will be perceived in their declensions. They govern the verbal nominative pronoun and not the nominative I.

 Nga-li ta, It is this that. Nga-li tá-ro, These be they that.

DUAL.

The Dual number is essential to this language, and so necessary, that conversation could not be continued without it. The Dual is common to all the Islands in the South Seas.

G.	Nga-lín ba bón,	Belonging to us two, ours, his and mine.
Ac*.	Nga-lín bón,	Us two, him and me.

* NOTE.—It will be perceived that the particles form the accusative into the other cases. So also in the following.

She and I.

N.	Ba-li Bo-un-to-a,	We two, she and I.
G.	Nga-lín ba no-un,	Belonging to us two, ours, hers and mine.

The two.

N.	{ 1. Bu-lo-a-ra,	The two.
	{ 2. Bu-lo-a-ro,	The two act as agents. In this case the word is declined as a noun in the 5th declension, to which model it is referred for the remainder of the cases.

CONJOINED DUAL CASE.

So designated in consequence of the two opposite cases being conjoined in one word, namely, the agent nominative and the accusative case; a peculiarity of this language. Active transitive verbs govern this case. N. A. means nominative and accusative, the figures refer to the person, M. masculine, and F. feminine.

1 Person N.	and 2 person A.	Ba-núng, I, thee.
1 Person N.	and 3 person A. F.	Bá-nó-un, I, her.
2 Person N.	and 3 person A. M.	Bi-núng, Thou, him.
2 Person N.	and 3 person A. F.	Bi-nó-un, Thou, her.
3 Person N. M.	and 2 person A.	Bi-ló-a, He, thee.
2 Person N. F.	and 2 person A.	Bín-tó-a, She, thee.

PLURAL, FIRST PERSON.

N.	{ 1. Nge-en,	We. There is no change in the plural as in the singular pronouns.
	{ 2. ———

A.	Nu-run,	You.

PLURAL, THIRD PERSON.

N.	Ba-ra,	They.
G.	Ba-run ba,	Belonging to them, their, theirs.
A.	Ba-run,	Them.

The remaining cases can be easily formed by the accusative and particles used in the above cases of the first person, on referring to the model of the first person *Nga-to-a*.

RECIPROCAL PRONOUNS.

In conformity with grammars in general these and the following classes of pronouns are noticed; but, it will be found that the particles formed from the roots of verbs constitute the particular character ascribed to each class of the following pronouns. The particle *Bo* which forms the reciprocal noun or pronoun is from the verb to be (accidental) with the particle of agency resolving itself into an accidental agent, for the particle *Bo* will not take the sense of Self in the majority of cases.

N. 1st. Person,	<i>Nga-to-a bo</i> ,	I myself, or I only, or I am the being who is.
N. 2d. Person,	<i>Ngin-to-a bo</i> ,	Thou thyself, or thou only, &c.
N. 3d. Person,	<i>Niu-wo-a bo</i> ,	He himself, or he only, &c.
D. 1st. & 2d. Person,	<i>Ba-li bo</i> ,	Our two selves, or we two only, &c.

And so of all the pronouns excepting the conjoined dual cases.

POSSESSIVE PRONOUNS.

This class has been shewn in the genitive cases of the respective personal pronouns and may be used with the noun or the verbal substantive noun; and, according to whichever might be subjoined, the character of the pronoun would be described.

<i>Em-mo-em-ba ta,</i>	Mine it is, or, it is mine, affirmatively.
<i>Un-ni ta em-mo-em-ba ko-ke-re,</i>	This is my house.
<i>Un-no-a ta ngi-ro-em-ba,</i>	That is thine.
<i>Ta-ra-rán ngi-ro-em-ba ko-ri-en,</i>	It is not thine, not.

NOTE.—The Idiom requires two negatives, the first privative, the second negative, meaning that Thou hast not in possession or belonging to thee. There is no verb for to have, to possess.

DEMONSTRATIVE PRONOUNS.

These also have been declined; but, being of so compound a nature, it may be further shewn, the manner of their use in the sense of Demonstratives, they may be applied to all the P. N. but the Duals.

<i>Nga-li,</i>	This.	<i>Nga-li ko ba,</i>	Belonging to this.
<i>Nga-li ko ba, bôn,</i>			This belongs to him. An Idiom.
<i>Nga-lo-a ko ba,</i>			Belonging to that.
<i>Nga-li noa,</i>			This is he who, (acts as an agent.)
<i>Un-ni noa,</i>			This is he, (the subject.)
<i>Yóng,</i>			There, that place.

THE INTERROGATIVE PRONOUNS.

<i>Ngan?</i>	Who? the person; never used as a relative.
<i>Mín?</i>	What? Which? the thing; never used as a relative.
<i>Won?</i>	Where? the place; never used as the relative.
<i>Ya-ko-ai?</i>	What manner? how? in what manner; never used as how much.
<i>Ya-ko.un-ta?</i>	When? at what time.

They have no word for time in this language, nor is this phrase ever used in any other mode than interrogatively.

INDEFINITE PRONOUNS.

<i>Yi-tur-ra-búl,</i>	Some one, some person or persons, of the 4th declension of nouns.
<i>Ta-rai,</i>	Other, of the 2d declension.

ABSOLUTE PRONOUNS.

<i>Ta,</i>	It is; not merely declarative, but absolute, it is derived from the substantive verb assertive. It is, <i>Ta</i> .
<i>Ta-ra,</i>	They are; the things, the plural of it is, these, those. It is of the 5th declension.
<i>Un-ni ta-ra,</i>	These are they which, or that are the subjects.
<i>Ngali ta-ro,</i>	These are they which, or that are the instrumental agents.
<i>Yan-tín,</i>	All, the whole, this is of the 2d. declension.
<i>Yan-tín to,</i>	All the — is the agent who, which, or that.
<i>Wa-kól lo,</i>	One only is the agent from wa-kól, one.

It will be perceived that the pronouns depend on the particles for the senses in which they are to be expressed, either as active agents, neuter subjects, personal objects, or local objects; and it will hereafter be shown that verbs depend on the pronouns for distinction of number, being in themselves only names of action, state, condition, or quality; impersonal, and only known as verbs, nouns, or adjectives by the use of particles, or as persons, by the respective pronouns attached. The interrogative pronouns will be exemplified in the illustrative sentences in the third part of this work.

PART II.

(CHAPTER I.)

OF THE VERB.

A VERB attributes an act to an agent, or, a state of being to a subject. Verbs sustain no change, whatever number or person may be the agent, or the subject; they are in this respect strictly impersonal; but, verbs sustain a change in respect to the sort of agency employed; as personal, or instrumental, and also according to the manner of doing or being: as, whether I do to myself, or to another, or, I do to another and he reciprocally does to me: or, when I continue to be or to do: or, when the action is doing again, or when permitted to be done by this, or, that agent; or, by another agent; or, when a thing acts as an agent, or is used as an instrument. Verbs are doubled to denote an increase of the state, or action. Verbs are conjugated by particles, each of which particles, contains in its root the accident attributed to the verb in its various modification: as, assertion, affirmation, negation, privation, tendency, existence, cause, permission, desire, purpose, &c., thus forming moods, tenses, and particles. The participles are conjugated according to their respective tenses, and are declined, either as verbal nouns, or verbal adjectives.

OF THE KIND OF VERBS.

Verbs are of the following description: viz., active or neuter, both of which are subject to the following accidents: viz.,

1. *Active Transitive*, or those which denote an action *that passes from the Agent to some external object*: as, I strike him, Bún-tán bón bang. This constitutes, *the active voice*, which states what an agent does to another, or, what another agent does to him, in which latter case it is equivalent to the English passive voice: as, Bún-tán bón literally, strikes him, meaning some agent now strikes him. Equivalent to he is now struck the nominative pronoun, being omitted to call the attention to the object, or accusative pronoun. When the accusative, or object

is omitted, the attention is then called to the act which the agent performs: as, Bún-tán bang, I strike, expressed often by I do strike.

2. *Active-intransitive*, or those which express an action *which has no effect upon any external object beyond the agent, or agents themselves*; that is, *the agent is also the object of his own act*; consequently the verb is necessarily reflex: as, Bún-kil-le-un bang, I struck myself. This constitutes *the reflective modification of the verb*. No. 2, of the 3 conjugation.

3. *Active-transitive-Reciprocal*, or those which denote an action that passes from the agent to some external object, which object returns the action to the agent who then becomes the object, and thus they act reciprocally one towards the other. Consequently the dual or plural numbers is always the subject of this form of the verb: as, Bún-kil-lán ba-li, thou and I strike each other reciprocally. Bún-kil-lán ba-ra, they strike each one the other reciprocally, or fight with blows. This constitutes *the reciprocal modification*. No. 3, ditto.

4. *Continuative*: as, *when the state continues, or the action is or was continued in without interruption*: as, Bún-kil-li-lín bang, I am now continuing in the action of making blows. It may be threshing or any other act, as beating, &c. &c. Denominated *the continuative, modification*, No. 1.

5. *Causative by permission, or preventive with a negative*: as, when we permit a person to do the act, or another to do the act to him: as, Búm-mun-bil-la-bón, let him strike, Búm-ma-ra-bun-bil-la-bón, cause some one to strike him, or the equivalent let him be struck. Búm-ma-ra-bun-bi yi ko-ra bón, let no one strike him.

6. *Causative by personal agency, or, those which denote the exertion of personal energy to produce the effect upon the object*: as, Ti-ir ta un-ni, this is broken. Ti-ir-bung-ngá unni, this is broken; but personal agency is understood equivalent to some person has broken this; or, this is broken by some one. See the 9th Conjugation, *Personal agency*.

7. *Causative by instrumental agency, or those which denote an effect produced by means of some instrument*: as, Ti-ir-bur-re-a unni, this is broken, by means of something understood. See the 10th Conjugation.

8. *Effective, or, those which denote an immediate effect produced by the agent on the object*: as, Umá bang unni, I made this; Pi-tul bang, I am glad, Pi-tul-má bón bang, I made him glad.

9. *Neuter, or, those which describe the quality, state, or existence of a thing*: as, Ke-kul láng unni, this is sweet; Tetti láng un-ni, this is dead; Won-nung ke no-a? Where is he? Un-ni ta, this is it; Mór-rón no-a kut-tán, he is alive; Un-nung no-a ye, there he is. In which the particles, Láng-ke,-ta, kut-tán, and, ye, are rendered into English by the neuter verb *is*.

10. *Double, or, those which denote an increase of the state, or, quality, or, energy*: as, Pitul no-a, he is glad; Pi-tul-pitul no-a, he is very glad; Tet-ti bara, they are dead; Tet-ti-tet-téi bara, they are dead or a great death among them; Kau-wul, great; Kau-wul-kau-wul, very great; Tau-wa, eat; Tau-wa-tau-wa, eat heartily.

11. *Privative, or those which denote the absence of some property*: as, U-mán bang un-ni, I make this or do this; U-pán-bang unni; I do this, not direct on the object itself, but with something or by the means of something as I write on this paper with a quill; U-pán bang unni yiring-ko, wi-yel-li ko, literally I make this quill for to speak or communicate. Whereas U-mán-bang unni yi-ring pen ka-kil-li ko, would mean I make this quill for to be a pen. When the act itself is spoken of privative of existence, it is thus expressed, U-ma-pa bang-ba; Had I made, or if the act existed privative of the effect, produced by the action it would be expressed thus; U-mai ngá bang unni, I had like to have made this.

12. *Im-minent, or, those which denote a readiness to be or to do*: as Pirriwul ka-té-a kun ko-a báng, lest I should be king. Bún-té-a kun ko-a bón báng, lest I should strike him.

13. *Inceptive, or those which describe the state as actually beginning to exist, or the action going to put forth its energy at the time spoken*: as Ka-kil-li ko-láng ba-li, we two are now going to live reciprocally together; Bún-kil-li ko-lang báng, I am now going to strike.

14. *Iterative, or, those which denote a repetition of the state or action*: as, Múr-rón ka-té-a kun-nun, shall live again; Bún-té-a kun-nun, will strike again.

15. *Spontaneous, or, those which denote an act of the agent's own accord*: as, Ti-ir kul-lín unni, this is breaking of its own accord, and not by external violence which is shewn in No. 6. Po-ir kul-le-un no-a, he has dropped himself, for, he is just born.

OF THE MOODS.

There are three Moods, viz., the Indicative, the Subjunctive, and the Imperative.

1. *The Indicative, which simply declares a thing*: as, Bún-tán báng, I strike; Un-ni ta, this is; the subject; Ngali no-a, this is he; the agent.

2. *The Subjunctive, which subjoins something to the verb*: as, wish, Bú-wil báng, I wish to strike, a desire, Bu-wa bang, I desire to strike, or I want now to strike; or, the purpose of the agent: as, Tanán báng u-wá, bún-kil-li ko, I come for to strike, &c. &c. &c.

3. *The Imperative which expresses the desire of the agent*: as, Bú-wa, strike, the person or persons addressed are desired to do the action. Búm-mun-bil-la, let strike. The person or persons addressed, are desired to permit the person named to strike; Búm-ma-ra-bun-bil-la, let strike. The person addressed is desired to permit any one to strike the person named. Bún-té-a ka, strike again. The person or persons addressed is desired to repeat the action. The Imperative form is often used to the first and third person or persons in which sense it denotes the desire of the agent to do the act at the time spoken: as, Bú-wa bánúng, I want to strike thee now; Bu-wa bi-lo-a, he wants to strike thee.

* NOTE.—The equivalent in many instances to the English Infinitive mood is the verb in regimen which denotes the purpose of the subject: as Minnaring ko unni? What is this for? Bún-kil-li ko, is the answer, the verb in regimen, for to strike.

OF THE TENSES.

THE VERB.

1. *The Present*, which asserts the present existence of the action or being of a thing at the time in which the assertion is made, to this period it is confined. There is no word for time. The signs of this tense are the following particles affixed to other consonants according to the respective conjugations of the verbs, viz, —án to the simple verb, —lán to the reciprocal verb, and —lín to the participle: as, Bún-tán, now strikes; Bún-ki-lán, now reciprocally strike one another: Bún-kil-lín, now striking; Bún-kil-li-lín, now continuing in the act of striking.

2. *The Preter-perfect*, which asserts the act as having been completed in a past period of the present day: as, Bún-ké-un,

has struck, this morning understood; Bún-kil-lé-un báng, I have struck myself this day.

3. *The Perfect past Aorist*, which asserts the act as completed, without reference to any particular period in past time: as, Bún-kul-la, struck. This is not the participle.

4. *The Pluperfect*, which asserts the act as completed prior to some other past circumstance. It is formed by the affirmative particle ta affixed to the past aorist, and is equivalent only to the English Pluperfect: as, Bún-kul-la ta, had struck.

5. *The Future Definite*, which asserts the act as taking place in a certain definite future period to the time in which it is spoken: as, Bún-kín, shall or will strike, tomorrow morning understood.

6. *The Future Aorist*, which asserts the mere future existence of the act without reference to any other circumstance, in some indefinite time to come: as, Bún-nun báng, I shall strike; Bún-nun no-a, he will strike.

THE PARTICIPLE.

1. *The Present*. This has already been described, it is only necessary to mention, that the present participle can only be used to the present time, and not to the past and future, as is the case in English; Bún-kil-lín, means now striking.

2. *The Imperfect Definite*, which asserts the action as present in progress at some definite past period: as, Bún-kil-li ké-un, striking, this morning understood.

3. *The Imperfect Past Aorist*, which asserts the action as present in progress at any recent time: as, Bún-kil-li-él-la no-a, he was striking.

4. *The Past Present Aorist*, which asserts the action as having been engaged in and completed in some former period: as, Bún-tál-la báng wonnai bám ba, I struck when I was a child; Wi-yál-la báng wonnai ki-lo-a wonnai bám ba, when I was a child I spake as a child.

5. *The Pluperfect*, which asserts the action as having been completed prior to some other past event mentioned: as, Bún-kil-li-él-la ta, had struck prior to something.

6. *The Inceptive Future*, which asserts the present action now about to be pursued: as, Bún-kil-li ko-láng báng, I am now going to strike, or, I am going a striking; Ma-ko-ro, fish; Ma-ko-ro ko-láng báng, I am going a fishing.

Names of Persons.

Ko-in, } Names of an imaginary male being. Who was
 Tip-pa-kál, } always as he is now; in appearance like a black;
 Pór-ráng, } he resides in thick brushes or jungles; he appears
 occasionally by day, but mostly at night. In general he precedes the coming of the natives from distant parts, when they assemble to celebrate certain mysteries, as knocking out the tooth in a mystic ring, or when performing some dance. He appears painted with pipe clay, and carries a fire-stick in his hand; but, generally, it is the doctors a kind of magicians, who alone perceive him, and to whom he says, "Fear not, come and talk." At other times he comes when the blacks are asleep, and takes them up, as an eagle his prey, and carries them away. The shout of the surrounding party often occasion him to drop his burthen; otherwise he conveys them to his fire place in the bush, where close to the fire he deposits his load. The person carried tries to cry out, but cannot, feeling almost choked: at daylight Ko-in disappears, and the black finds himself conveyed safely to his own fire-side!

Tip-pa-kal-lé-un, } Names of the wife of Koin. She is a
 Mail-kun, } much more terrific being than her husband,
 Bim-póin, } whom the blacks do not dread, because he
 does not kill them; but this female being, not only carries off the natives in a large bag net beneath the earth, but she spears the children through the temple dead, and no one ever sees again those whom she obtains!

Ko-yo-ró-wén, The name of another imaginary Being. Whose trill in the bush frequently alarms the blacks in the night. When he overtakes a native, he commands him to exchange cudgels, giving his own which is extremely large, and desiring the black to take a first blow at his head, which he holds down for that purpose, after which he smites and kills the person with one blow, skewers him with the cudgel, carries him off, roasts and then eats him!

Kur-ri-wilbán, The name of his wife; she has a long horn on each shoulder growing upward, with which she pierces the Aborigines, and then shakes herself until they are impaled on her shoulders; when she carries them to the deep valley, roasts and eats her victims. She does not kill the women, they being always taken by her husband for himself. Ya-ho, has by some means been given to the blacks as a name for this being.

Put-ti-kán, Another imaginary being, like a horse; having a large mane, and tail sharp like a cutlass, whenever he meets the blacks they go towards him and draw up their lips to shew that the tooth is knocked out, when he will not injure them; but should the tooth be left in, he runs after kills and eats them. He does not walk, but bounds like a kangaroo, the noise of which on the ground is as the report of a gun, calling out as he advances, Pir-ro-lóng, Pir-ro-lóng!

The following are names of men, derivation unknown.

Bum-bo-ro-kán. Tin-na-be-un-ba. Yi-pai. Mi-kun-nun. Mur-rai. Wúl-lu-ti.

- Mul-lung-bu-la, The name of two upright rocks about nine feet high, springing upon the side of a bluff head on the margin of the lake. The blacks affirm from tradition, that they are two women who were transformed into rocks, in consequence of their being beaten to death by a blackman. Beneath the mountain on which the two pillars stand, a seam of common coal is seen many feet thick, from which *Reid* obtained a cargo of coals, when he mistook the entrance of this Lake for Newcastle; a wharf, the remains of his building, still exists at this place: from whom the name *Reid's mistake* is derived.
- Mún-nu-kán, The name of a point, under which is a seam of canal coal, beneath which a thick seam of superior common coal joins, and both jet into the sea betwixt three and four fathoms of water. The Government Mineral Surveyor found on examination, that the two veins were nearly nine feet in thickness, and the coal of excellent quality. From *Nik-kin*, Coal, a place of coals. The whole lake twenty-one miles long by eight, abounds with coal.
- Nik-kin-ba, Any plain, a flat.
- Nga-ra-won-tá-ra, The female Emu place; from *Ngór-ro-in* the female Emu; the male Emu is *Kóng-ko-róng*, from his cry.
- Ngór-ró-in-ba, A point of land on the S. side of the lake.
- Ngo-lo-yáu-wé, The name of the Island at the entrance of the lake, from *Nir-rit-ti*, the muton bird which abounds there.
- Nir-rit-ti-ba, A place of pipe clay; from *Pit-to*, pipe clay, which is used by the deceased's relatives to paint over the whole body, as mourning.
- Pit-to-ba, The Ants nest place; from within,
- Pur-ri-báng-ba,

Wau-wa-rán,

The name of a hole of fresh water in the vicinity of Lake Macquarie, betwixt it and the mountains Westerly: said by the blacks to be bottomless, and inhabited by a monster of a fish much larger than a shark, called *Wau-wai*, it frequents the contiguous swamp, and kills the aborigines! There is another resort for these fish near an Island in Lake Macquarie, named *Bo-ro-yi-róng*; from the cliffs of which, if stones be thrown down into the sea beneath, the tea tree bark floats up, and then the monster is seen gradually arising from the deep; should any natives be at hand, he overturns the canoe, swallows alive the crew, and then the canoe whole, after which he descends to his resort in the depths below!

Yi-rán-ná-lai,

The name of a place near Newcastle on the sea beach beneath a high cliff, where, it is said, that if any persons speak, the stones fall down from the high arched rocks above, the crumbling state of which is such as to render it extremely probable, that the concussions of air from the voice causes the effect to take place; which once occurred to myself, after being warned, in company with some blacks.

Wá-ra-wol-lung,

The name of a high mountain. West of Lake Macquarie; which has been partly cleared of timber by order of the Surveyor General as a mark, which is seen from a considerable distance. The name appears to be derived from *Wol-lung*, the human head from the appearance of the mountain.

Kur-rur-kur-rán,

The name of a place, in which there is, almost, a forest of petrifications of wood, of various sizes extremely well defined. Situated in a bay at the N. W. extremity of Lake Macquarie. The tradition of the Aborigines is, that formerly it was one large rock which fell from the heavens and killed a number of blacks, which were assembled where it descended, they being collected together in that spot by command of an immense Guana, which came down from heaven for that purpose. In consequence of his anger at their having killed lice by roasting them in the fire, those who had killed the vermin by cracking, were previously speared to death by him with a long reed from Heaven! At that remote period the moon was a man named *Pón-to-bung*, hence the moon is called *he* to the present day; and the sun being formerly a woman, retains the feminine pronoun *she*. When the *Guana* saw all the men were killed by the fall of the stone, he ascended up into heaven, where he is supposed now to remain.

hundreds of miles on the sea coast, and
in the interior; one is now here from
Moreton bay, the interior of which, a
black shewed me privately in my study,
betraying considerable anxiety lest any
female should see the contents. After
unrolling many yards of woollen cord
made from the fur of the opossum, the
contents proved to be a quartz-like sub-
stance of the size of a pigeon's egg, he
allowed me to break it and retain a part,
it is transparant like white sugar candy;

which crumble off, as a preventative of

fire. The vein from which it appears
broken off, is one inch and a quarter
thick. A third specimen contained a
portion of cornelian partially crystalized,
a fragment of chalcedony, and a fragment
